

## Texecom Connect

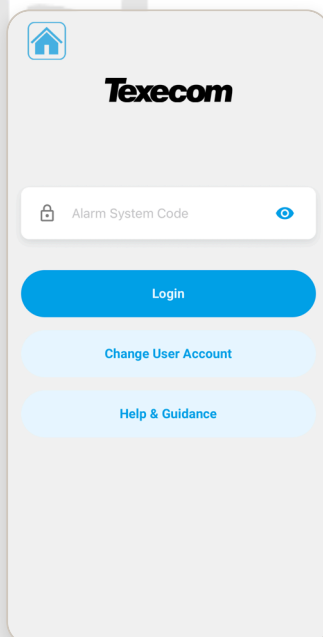

Setting up the app on your phone

Texecom Connect lets you arm, part arm and disarm your alarm from your phone, wherever you are. Setting it up takes about five minutes.

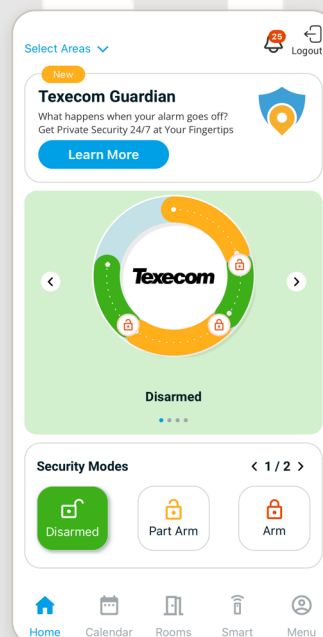

- 1 Look out for our email**  
Once we've added you to your alarm system, you'll get an email from Texecom asking you to **create a password**. Tap the link and choose one. Check your junk folder if it hasn't arrived.
- 2 Download the app**  
Search for **Texecom Connect** in the App Store (iPhone) or Google Play (Android) and install it.
- 3 Log in**  
Open the app, enter the **email** we added for you and the **password** you just created, then tap **Sign in**.  
*Please don't use "Sign up" – your account is already set up.*
- 4 Enter your alarm code**  
When asked for your **Alarm System Code**, enter the same **4-digit user code** you use on the keypad and tap **Login**.
- 5 You're in**  
From the home screen you can **Arm** the alarm when you leave, **Part Arm** it (for example at night), **Disarm** it, and see alerts using the bell icon.

**Step 3** · Sign in with your email and password

**Step 4** · Enter your 4-digit alarm code

**Step 5** · Arm, part arm or disarm

### Faster login

Use Face ID or your fingerprint instead of your password – turn it on in the app's settings.

### Forgotten password?

Tap "Forgot Password?" on the login screen to reset it.

### Adding family members

Send us their email addresses and we'll add them to your system.
