Get social or stretch out,
with more room for recovery

The Sanso T68 has been expertly designed to accommodate 6-8 people, with room for shared therapy sessions or collaborative working.

Whether you're an athlete, wellness enthusiast, or a professional team seeking a unique health-focused environment, the T68 offers a shared space where comfort and productivity meet. This versatile space is ideal for those looking to combine the benefits of oxygen therapy with the opportunity to connect, strategize, and innovate in a relaxed setting.

Longer

or

Wider

Vertically long design

This model features a vertically long design, optimizing space while maintaining a compact footprint. Its solid construction and spacious interior offers you ample room for comfort without sacrificing durability.

Advanced control and operation

The T68 comes equipped with a user-friendly control device and an adjunct pump, both included with your space. These components allow for precise control over the therapy environment, ensuring optimal comfort and effectiveness during each session.

Shared recovery and collaboration

Whether you're facilitating a group wellness session, hosting a collaborative team meeting, or enjoying a shared therapy experience, the T68 offers the comfort, privacy, and control you need. This space makes for a relaxed, inspiring environment where everyone can benefit from oxygen therapy — while also engaging in productive collaboration.
