- L3 FA2100 SSCVR (120 min)
- L3 SSFDR (25 hours)
- Artex B406-4 ELT with Nav Interface
- Collins QAR-100 Quick Access Recorder

Interior

This particular example of the Global 6000 offers the much-preferred 13-passenger configuration, for maximum flexibility, along with the desirable Office in the Sky package. A single chair in the mid-cabin section also joins the four-place dining area to create the full dining / conference experience in outstanding comfort.

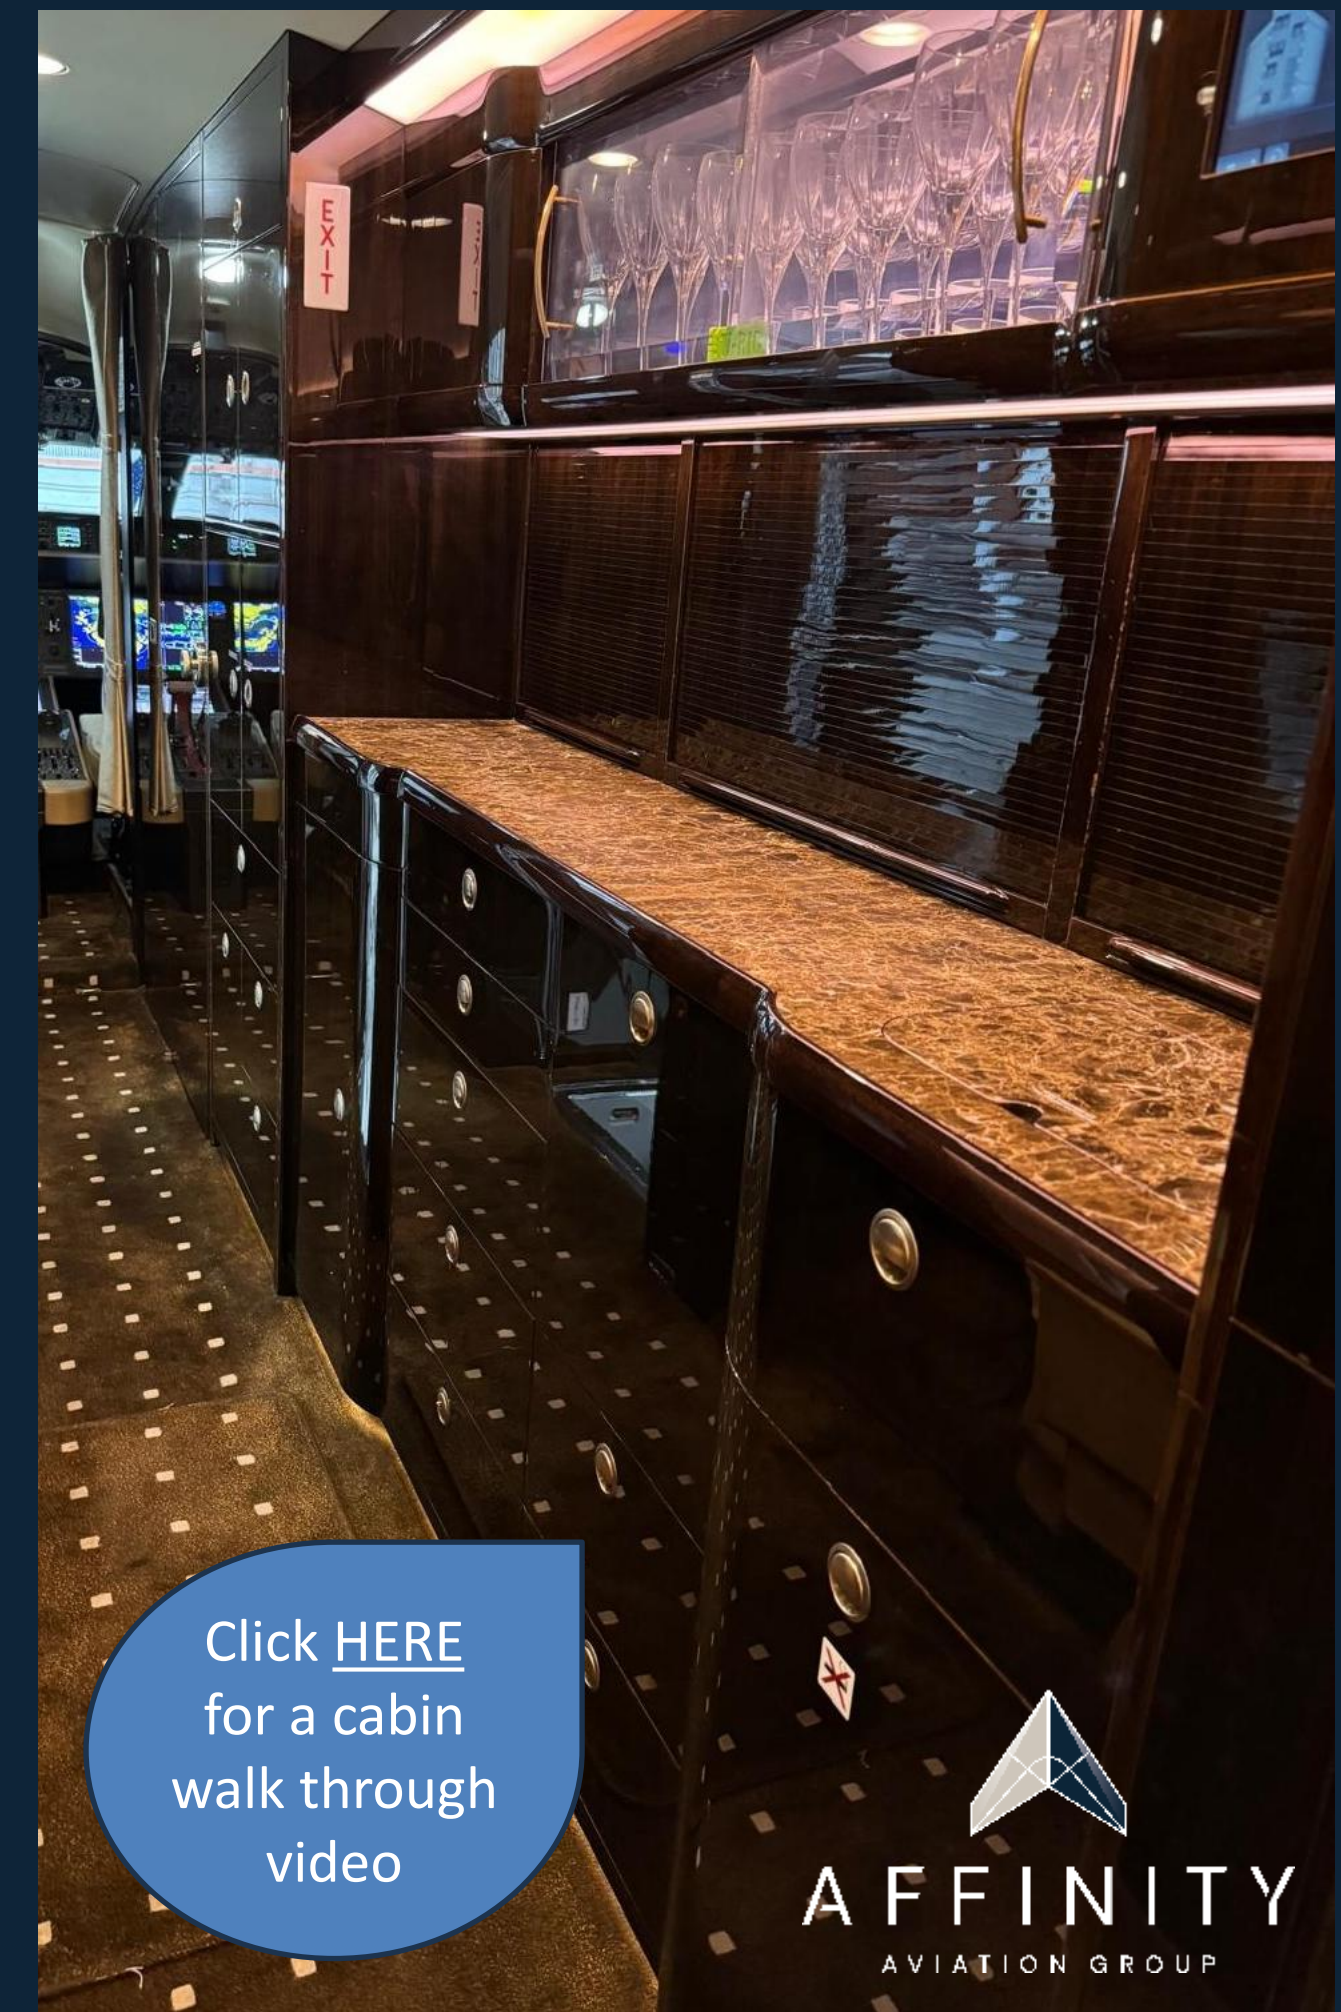

A full-size galley featuring ovens, coffeemaker, sink with hot and cold water and plentiful storage is found in the entrance zone, along with a valuable crew rest area and lavatory that enables the main passenger cabin to remain uninterrupted during long flights.

Moving through into the forward cabin area, passengers are offered the traditional 'Club Four' arrangement with full VIP seating and fold-out tables.

The mid-cabin section offers that most desirable feature of a four-place conference / dining area, providing additional space throughout the flight. A credenza storage unit and additional single VIP chair are positioned opposite this dining area.

In the aft cabin, a three-place berthable divan and two additional chairs offer a separate quiet place for relaxing or sleeping.

A private aft lavatory and further access to the luggage area complete the comfortable and highly-flexible interior.
