

How ExperTech Moved from Reactive Microsoft 365 Security Reviews to Continuous, Proactive Monitoring Across Hundreds of Managed Tenants with Overe

ExperTech is a Medellin-based Microsoft Solutions Partner and MSP that has been serving companies across Colombia and Latin America for more than 15 years. Certified across all six Microsoft Solution Partner specialisations and ISO 27001 accredited, ExperTech manages Microsoft 365 environments for hundreds of organisations across sectors including finance, healthcare, manufacturing, and the public sector.

CHALLENGE

ExperTech's security visibility depended on manual SOC team validations and Microsoft Secure Score metrics. Obtaining detailed information on application permissions, account status, deployed configurations, potential risks, and improvement recommendations required manual processes that were time-consuming and inconsistent across environments.

Key challenges:

- Manual SOC reviews and Secure Score metrics as primary visibility tools
- No centralised view across the managed tenant portfolio
- Data collection, not remediation, consuming engineering time
- Scaling security assurance across hundreds of client organisations

Name	Richar Salazar
Company	ExperTech

Industry	Managed IT Services (MSP)
Location	Medellin, Colombia
Focus	Microsoft 365 managed services across Colombia and Latin America

SOLUTION

ExperTech adopted **Overe** to automate collection, correlation, and analysis of critical tenant information. The team now has continuous security posture evaluation, centralised monitoring of critical events and configurations, and immediate access to prioritised recommendations. **Engineers can quickly identify risks, validate permissions, and act on findings without spending time on repetitive data collection.**

How ExperTech Moved from Reactive Microsoft 365 Security Reviews to Continuous, Proactive Monitoring Across Hundreds of Managed Tenants with Overe

THE STRATEGIC PARTNERSHIP

ExperTech now **detects problems before they turn into incidents**, responds more quickly, and maintains uniform security standards across all managed tenants. **Engineers spend more time on higher-value client work**, and security assurance across the portfolio is more consistent, more scalable, and more credible.

"If you know Microsoft 365 security matters but you are still managing it manually or inconsistently, Overe makes the work much more manageable. It does not replace cybersecurity judgment, but it gives you a stronger foundation for assessing posture, prioritizing improvements, and helping customers understand what needs attention."
- **Richar Salazar, Engineering Lead, ExperTech**

RESULTS

- ✓ **Continuous, automated monitoring** replaces reactive manual SOC reviews
- ✓ **Centralised visibility** across hundreds of managed Microsoft 365 tenants
- ✓ **Faster risk identification** with prioritised recommendations ready for action
- ✓ **More time for engineers** to focus on remediation and higher-value client work
- ✓ **Uniform security standards** maintained consistently across all managed tenants

By adopting Overe, ExperTech has made Microsoft 365 security management more proactive, more consistent, and more scalable across every managed tenant.

WHY IT MATTERS?

For an MSP managing Microsoft 365 across hundreds of client organisations, continuous visibility and automated analysis are not optional. Overe gives ExperTech that foundation, making it possible to deliver consistent, scalable security assurance without growing the team proportionally.

READY TO SEE BY YOURSELF?

Get started now with Overe.

Get full platform access, Assess, Harden, Monitor, and Respond, on your own tenant with a 14-day free trial. No commitment beyond the 14 days.
