

# How Wieza Moved from Manual Microsoft 365 Security Reviews to a Structured, Repeatable Practice Across Every Managed Tenant with Overe

**Wieza** is a Poland-based MSP helping small and medium-sized businesses manage and secure their Microsoft 365 environments. As the portfolio of managed customers grew, the team needed a more structured way to assess and review tenant security without the process becoming a manual burden on engineers.

## CHALLENGE

As the number of managed tenants grew, so did the time required to review each one properly. Collecting and interpreting security data from multiple tenants meant pulling information from several sources, applying engineering judgment at each step, and doing most of it manually. Security reviews were time-consuming, difficult to make consistent across customers, and dependent on individual engineer experience.

### Key challenges:

- No single view across all managed Microsoft 365 tenants
- Manual data collection from multiple sources consuming engineering time
- Security reviews lacking consistency and repeatability across customers
- Difficulty scaling security services without placing excessive burden on the team

## SOLUTION

Wieza adopted **Overe** to bring structure and consistency to Microsoft 365 security reviews across its full customer base. The team now has a single view of every managed tenant, with assessments structured around best practices and misconfigurations prioritised by severity. **Overe also supports customer conversations directly, identifying what additional security capabilities customers could gain by upgrading their Microsoft 365 licences, together with an indicative cost of doing so.**

# How Wieza Moved from Manual Microsoft 365 Security Reviews to a Structured, Repeatable Practice Across Every Managed Tenant with Overe

## THE STRATEGIC PARTNERSHIP

Wieza now has **structured, repeatable security reviews** across every managed tenant, **replacing manual data collection with a single consistent view and freeing engineers to focus on** analysis, priorities, and action rather than data gathering.

*"If you manage multiple Microsoft 365 environments and want to develop security-related services, Overe is definitely worth a closer look. It is simple to implement, convenient in day-to-day work, and helps quickly organise a large amount of information. For a small MSP, this means real time savings and better use of team resources, while still maintaining a good standard of customer service."*

- Romuald Żarnecki, Board Member, Wieza

## RESULTS

- ✓ **Security reviews** structured, repeatable, and consistent across all managed tenants
- ✓ **Engineers move** directly from data to analysis, priorities, and planned actions
- ✓ **Licence upgrade recommendations** support proactive customer conversations about security investment
- ✓ **Consistent security standards** maintained without increasing team burden or headcount
- ✓ **More time available** for customer relationships and genuine security improvements

By adopting Overe, Wieza has made Microsoft 365 security reviews faster, more consistent, and more useful for both the team and the customers they serve.

## WHY IT MATTERS?

For a small MSP trying to grow security services without growing headcount, structure and repeatability are what make scaling possible. Overe gives Wieza that foundation, turning manual, expertise-dependent reviews into a consistent practice that delivers value to every customer.

## READY TO SEE BY YOURSELF?

**Get started now with Overe.**

Get full platform access, Assess, Harden, Monitor, and Respond, on your own tenant with a 14-day free trial. No commitment beyond the 14 days.
