- ✓ **Proven Expertise & Track Record**
- ✓ **Advanced Equipment & Safe Solutions**
- ✓ **Operational Assurance & Protection**

Our Services

Precision Floor & Equipment Cleaning

We clean raised floors, racks, cabinets, and HVAC systems without disrupting operations, extending equipment life and improving thermal efficiency.

Environmental Monitoring & Risk Assessment

We test airborne particulates and inspect for contamination risks, providing ISO 14644 compliance reporting to identify problems before they impact performance.

Ongoing Maintenance Programs

Custom maintenance schedules prevent equipment failures and maintain continuous protection with consistent anti-static treatments and cleaning protocols.

Emergency Response Services

We rapidly deploy to address contamination events, pre-installation cleaning and post-construction dust remediation.

Ready to Protect Your Infrastructure?

Contact us today for a free environmental assessment and discover how we keep Canada's critical systems running at peak performance.
