Team Comments

- Struggled to defend transitions, with too much space left between midfield and defensive lines after losing the ball.
- Full-backs provided strong width, but delivery quality and decision-making in the final third must improve.
- Excellent build-up patterns, especially when creating overloads on the left side, allowing clean progress through zones.
- Created multiple chances, but finishing lacked composure and precision inside the box.
- Transitions to attack were effective, especially when central midfielders broke lines with forward runs.

- Struggled to defend transitions, with too much space left between midfield and defensive lines after losing the ball.
- Pressing structure was inconsistent, with the first line engaging but midfield lines reacting too slowly.
- Allowed too many unopposed crosses, indicating poor timing and cohesion in wide defensive support.
- Centre-backs were confident stepping in, helping the team compress space and sustain attacks.
- Game management improved late on, showing better tempo control and collective decision-making in key moments.

Players Comments

<p>Liam Cartwright</p> <p>Calm presence throughout; distributed well under pressure and made smart decisions when playing out from the back. Could be more vocal organizing the defensive line during wide attacks.</p>	<p>Reece Halloran</p> <p>Provided consistent width and supported attacks effectively. Defensively solid 1v1, but recovery runs need to be faster when possession is lost high up the pitch.</p>
<p>Marcus Fenwick</p> <p>Offered a good balance between overlapping and inverted movements. Delivery from final third areas can improve, but pressing reactions were excellent.</p>	<p>Jamal Oduro</p> <p>Strong in duels and clean with build-up passing. Stepped into midfield at the right moments, but must improve body shape when defending long diagonal balls.</p>
<p>Tyler Mendes</p> <p>Good defensive positioning and covered depth well. Could be more aggressive when attacking aerial balls, especially from second phases.</p>	<p>Oliver Branson</p> <p>Controlled the tempo and provided stability. Broke up transitions well but can speed up circulation when the team faces a low block.</p>
<p>Mateo Villalba</p> <p>High work-rate and consistent ball progression. Lost a few duels in transition moments but contributed positively with forward runs.</p>	<p>Darius Kavanagh</p> <p>Connected lines effectively and found pockets between the opposition midfield. Decision-making in the final action (pass vs shot) needs to be sharper.</p>
<p>Lucas Beaumont</p> <p>Constant threat attacking the inside channel. Combined well with the full-back but must improve timing of movements in behind.</p>	<p>Jordi Navarro</p> <p>Dangerous in 1v1 situations and created several promising moments. Needs more consistency in defensive tracking and pressing triggers.</p>
<p>Callum Drayton</p> <p>Held up the ball well and created space for others. Missed a couple of key chances—needs more composure in decisive moments.</p>	<p>Ruben Markovic</p> <p>Provided fresh legs and pressed defenders aggressively. Needs more awareness when making runs to stay connected to midfield support.</p>
<p>Sergio Calderón</p> <p>Added intensity and ball-winning presence. Forward passing was positive, though positioning when pressing was sometimes too high.</p>	<p>Brandon Kade</p> <p>Came on to stabilise the back line and did well reading second balls. Passing under pressure can improve.</p>
<p>Milan Duarte</p> <p>Brought energy on the flank and tightened defensive organisation. Needs to adjust body shape quicker when opponents switch play.</p>	<p>Ryan Ashford</p> <p>Injected pace immediately and stretched the opposition. End product needs refinement—good situations but no final impact.</p>
