

Who We Serve?
Retirees and busy professionals in need of home maintenance, management and modifications

The rule of thumb is to budget 1-4% of your home's value for maintenance and improvement expenses

For example, if your home is worth \$600,000, that means spending \$6,000-\$24,000 per year

For ~1% of your home's value we provide the following:

- A home maintenance plan
- Monthly visit to complete maintenance plan
- Monthly report of concerns or issues
- Manage a five-year home improvement plan
- Access to our vetted, local network of subs
- 24-hour response to requests between visits
- Reduced rates for our team on other work
