

656 Twin Wire

656 mesh is a versatile entry level flat panel twin wire mesh system which is the next step up in security protection from single wire systems. Double wire systems are inherently vandal resistant and offer great cut-through protection than single wire systems. One edge of the panel is finished flush and the vertical wires extend over the other edge to form a barbed top. This produces a simple and effective deterrent to scaling the fence. For a less aggressive look the barbed edge may be positioned at ground level. Our 656 easy to install system is manufactured from galvanised and powder coated steel to give a resilient weatherproof finish. This superb system is offered in standard RAL colours whilst non-standard colours can be specified as a cost option. CLA's 656 mesh can be secured to the support posts using either our standard mesh clip or for higher security areas we offer a full length clamp bar option. Both options are supplied with anti-tamper fixings which fit into our inserted posts

Suitable For:

- Schools & Car Parks
- Retail Premises
- Business Parks
- Industrial Sites
