

# PEDESTRIAN GUARDRAIL

**GUARDRAIL, DESIGNED AND MANUFACTURED BY CLA, IS AN EFFECTIVE SOLUTION FOR PEDESTRIAN SAFETY. GUARDRAIL IS DESIGNED TO GIVE PROTECTION TO BOTH PEDESTRIANS AND MOTORISTS AT ROAD JUNCTIONS, CROSSINGS AND WALKWAYS.**

It combines strength with transparency, allowing excellent visibility for both motorists and pedestrians alike. CLA offer two types of rails, a standard PG1 and a PG2, which incorporates an additional visibility gap or “letterbox”.

Both designs are manufactured in our West Midlands factory using premium materials. Our panels are 900mm high and 2000mm wide, feature 12mm diameter infills at 109mm centres and are framed in 50x25 RHS. They are prepared to allow panels to be bolted together. Guardrail is hot dip galvanised as standard, but can be customised with a cost option PPC finish.

For more information or a quick no-obligation quotation please contact our sales team.

## STANDARD AND CUSTOM FINISHES

Galvanised PG1

Black 9005 PG2

| TYPE | HEIGHT | PANEL WIDTH | BAR INFILL | BAR CTRS | FRAME SIZE    |
