Global Sovereign University

Free education for all.

Free classes. Free certificates anyone can verify. A free AI tutor in 83 languages.

No tuition. No login to learn. Funded entirely by book sales.

Different by Design. Better by Mission.

globalsovereignuniversity.org

A school without walls

Global Sovereign University is a tuition-free 501(c)(3) nonprofit that opened on July 1, 2025. It exists for one reason: so that anyone, at any age and any starting point, can climb as far as they choose.

Most of our learners begin around a sixth-grade reading level, and many are adults. That shapes everything we build. Lessons are written plainly. Tools explain themselves. Nothing requires an account to begin, and nothing a visitor types into our learning tools is sold or shared. Each learner climbs a tiered path to the level they want, whether that is reading a lease with confidence, passing a trade certificate, or starting a business.

HOW GSU IS PAID FOR

GSU has no tuition and no government funding. Its only income is the sale of books written by its founder, Dr. Gene A Constant, who has donated a catalog of more than 270 titles to The Foundation for Global Instruction (EIN 39-2716552), based in Eugene, Oregon. Every book sold keeps the classes free.

WHAT WE MEAN BY SOVEREIGNTY

"The capacity to remain in relationship with reality without being ruled by the demand that reality conform to expectation. Retaining the ability to choose a response. Not control. Not never being shaken."

From *Surprise Is Constant*, by Dr. Gene A Constant

AN HONEST WORD

GSU teaches, for free, and says plainly what it is. It is not an accredited college and does not grant college credit or degrees. A GSU certificate is proof of knowledge, serial-numbered and verifiable by anyone online. For learners who want college credit, GSU builds the reading, writing and math foundation and points the way to recognized programs.

Begin where you are

No sign-up, no test to get in, and no wrong door. These are the first steps most learners take.

Free Grade Level Check

A short, private check of reading and math for grades 4 to 8, with no sign-up, so you know exactly where to begin.

read.globalsovereignuniversity.org

Reading

Rebuild reading strength at any age, from first sounds to full books, with Listen on every page.

[/readification](#)

Phonics and Adult Literacy

Letter sounds and decoding taught with dignity for grown-ups, plus the Adult Literacy Lab for private practice.

[/phonics](#)

Spelling and Writing

Clear words, clear sentences, strong paragraphs: the writing every job and every college course expects.

[/writification](#)

GENO, the AI tutor

Ask anything, any hour, in your own language. GENO answers and coaches; he does not lecture. Built to work even without the internet.

[/free-tutor](#)

Write in your language

A button on every page. Write to GSU in the language you think in, and you are welcomed in it. A person replies.

[/contact](#)

Read or listen in your language

Most pages can be read in your language or read aloud in your device's own voice.

[/language-lab](#)

Everything, on one page

The full map of GSU, every hub and class in one place, for visitors who like to see it all.

[/future-of-education](#)

Prove what you know

Every GSU certificate class follows the same pattern: read the book free in your browser, work one lesson per chapter, then pass a graded exam. A pass earns a serial-numbered Certificate of Comprehension anyone can verify online.

THE TRADES

- Trades Geometry
- Residential Electrical
- Residential Framing
- HVAC
- Home Plumbing
- Basic Appliance Repair
- The Stonemason's Discipline

BUSINESS AND JUDGMENT

- Entrepreneurship
- The Real Org Chart
- Surprise Is Constant

MAINTENANCE AND OPERATIONS

- Building Maintenance
- Total Productive Maintenance
- Modern TPM
- AI + TPM

DIGITAL AND COMMUNICATION

- Computer Literacy Unlocked
- Every Way We Speak

HOW A CERTIFICATE WORKS

Classes are free and open: no account is needed to read or practice. The exam is graded on GSU's server, so a certificate cannot be printed without passing it. Each certificate carries a serial number, and any employer, parent or school can confirm it on the GSU website in seconds. It is proof of knowledge, not college credit or a license.

All certificates

The trades: work every building depends on

GSU treats the skilled trades as a first-class road, not a fallback. The Guild brings together free trade classes, field tools and the books behind them.

The Field Room: count the ceiling tiles and the page measures the room.

The Field Room takes the book outside. Its first tool turns a ceiling into a ruler: count the tiles and it draws the room to scale, then gives you the floor area, the flooring to buy with 10 percent for cuts, and the paint.

The Ouroboros: follow one copper pipe from mine to recycling.

Classes with free certificates

Trades Geometry, Residential Electrical, Residential Framing, HVAC, Home Plumbing, Basic Appliance Repair, The Stonemason's Discipline and Building Maintenance.

/tradification

Field references

Printable references like the HVAC Total External Static Pressure card: five steps, the common causes, ready for the truck.

The Field Room

Learning that happens in the real world, with Golden Eggs for readers who bring the lesson back.

/field-room

Who Ouroboros Is

An interactive ring showing how every trade links into one loop, and what happens when a link breaks.

/ouroboros

Think like an owner, free

Business is the founder's deepest field. GSU's business pages give owners and future owners the tools usually reserved for people who can afford consultants.

740 of 1,000 futures are still open at month 12.

Where a future failed, it most often ran out of cash around month 3. You break even at about 34 sales a week; you start at 36.

The Owner's Forecast: one plan, a thousand possible futures.

The Owner's Forecast runs your own plan through 1,000 possible twelve-month futures, right in your browser. It shows how many survive, draws every one as a fan chart, and tests five changes to find the one that saves the most. A built-in mentor talks through the results.

Entrepreneurship

The owner's questions, a cash simulator called Profitable and Broke at the Same Time, the Owner's Gauntlet of pricing decisions, and a free certificate exam.

/entrepreneurship

The What If Machine

Ask "what if" about any decision and follow the branching consequences before they arrive.

/what-if

Business and Operations

Ten free business and operations classes being built from the founder's books, beginning with The Real Org Chart.

/business

The Sovereign Vault

A business vault that stays locked until a learner earns Gold Certification in a trade. Ownership as the reward for mastery.

/sovereign-economic-incubator

PRINTABLE OWNER CARDS

The Pre-Mortem Card and the Owner's Scorecard, from the book From Risk to Reward, put the habits on paper: imagine the plan has failed and fix it now, and track five numbers every month.

A campus of subject hubs

Each hub gathers lessons, tools and readings on one subject, written plainly enough to start from the beginning.

Mathematics

From counting to confidence.

The Language of Math

Math taught as a language, with its own grammar.

Money and Finance

Budgets, credit, saving and sense.

Economics

How choices add up to markets.

Money for Kids

Earning, saving and giving, for young learners.

Science

How the world works, by asking.

Biology

Life, from the cell up.

Computer Literacy

Digital confidence from the first click.

Digital Skills

Tools and habits for working online.

Health and Vitality

Body, mind and daily habits.

First Aid

What to do in the first minutes.

Humanics

People skills: emotions, communication, relationships.

Critical Thinking

Fallacy Finder, Bias Detector and more.

Master Architect

Three volumes, Bronze to Platinum.

Geography

The world, place by place.

The American Story

The nation's history, told plainly.

Civics

How government works and how to take part.

Rights and Responsibilities

What you are owed, and what you owe.

World Languages

Learn any language with GENO.

The Silent Language

Body language and unspoken signals.

Debate

Arguing well and fairly.

Leadership and Influence

Leading people with honesty.

Deep Research Vault

Original long-form research dossiers.

Reading Arsenal

Nine interactive phonics and literacy labs.

Scan for the full map of GSU, with every hub and class on one page.

Every hub, one page

Learning at home, with the records to show it

GSU's homeschool campus gives families free lessons, applied-learning tools and printable resources, plus a way to keep an honest record of the work.

The homeschool campus

Subjects, lessons and free downloadable lesson plans for homeschool families, organized by age and subject.

/homeschool

The Sovereign Transcript

A free progress report built on the family's own device from badges, lessons, certificates and the parent's own portfolio entries. Nothing is uploaded. Each state sets its own homeschool record rules.

/homeschool

Applied Learning

Sixty-eight free interactive activities in reading, math, reasoning, character, money and the trades, plus The Fault Bench, a diagnostic bench for six real appliance faults.

/games

The Library

A growing library of GSU books, free to read in your browser, with Listen on every page.

/library

Works without us

A whole campus on a USB stick, books you own, and a tutor that needs no internet, for homes and places with poor connections.

/works-without-us

The Generations Table

A printable conversation card for a grandparent and grandchild, or any two people who see things differently.

/fractured-words

Finish what you started, or build something new

About 37.6 million working-age Americans have some college and no credential (National Student Clearinghouse, June 2025). GSU built one page for them, with three honest roads.

Road 1

Earn college credit by exam

Many colleges award credit for passing a CLEP exam: 34 exams in subjects like composition, American history, government, psychology and management. Pass, and you may skip the class. More than 2,900 colleges accept CLEP, and each college decides which exams and scores it accepts.

The best free route we know: **Modern States**, a nonprofit, offers free courses taught by college professors for the CLEP exams, and pays the exam fee for learners who complete the coursework.

- **First**, check your college's CLEP policy.
- **If your reading or math is rusty**, use the free GSU reading, writing and math pages first. That is what we are here for.
- **Then** take the free Modern States course and request your exam voucher.

Modern States

CLEP and college policies

Modern States' terms may change; check their site for current requirements.

Road 2

Learn a trade, and get paid while you learn

The trades are not a lesser road. They are the work every home, school and hospital depends on, and many are learned through an apprenticeship: three to five years of paid, on-the-job training with classroom instruction. You earn while you learn, instead of borrowing while you learn.

One example: electricians earned a median of \$62,350 in May 2024, and the field is projected to grow 9% from 2024 to 2034, much faster than average. Most learn through a 4- or 5-year apprenticeship.

Start the knowledge free, today, with GSU classes that end in a free certificate exam:

- [Residential Electrical, Plumbing, HVAC, Solar PV](#)
- [Framing, Stonemasonry, Appliance Repair, Building Maintenance](#)
- [Trades Geometry](#): the math every trade uses

See all the trades

Source: US Bureau of Labor Statistics, Occupational Outlook Handbook and apprenticeship data.

Road 3

Prove what you already know

Work and life teach a great deal that no transcript shows. GSU's free classes end in a free exam, and passing earns a serial-numbered Certificate of Comprehension that anyone can check online.

A GSU certificate is proof of knowledge, not college credit. Show it to an employer, add it to a résumé, or use it as a step toward the road above.

- [Entrepreneurship](#): start a business with the owner's questions answered
- [Computer Literacy](#): digital confidence from the first click
- [Surprise Is Constant](#): judgment under uncertainty

All certificates

Road 1, credit by exam: check your college's policy, rebuild reading, writing or math at GSU, then take free CLEP preparation through Modern States, a nonprofit that pays the exam fee for learners who complete its coursework. Road 2, the trades: paid apprenticeships of three to five years, and GSU's free trade classes to start the knowledge today. Road 3, a skills certificate: proof of what you already know.

Finish What You Started

Two feeds, one town

Fractured Words, Fractured Worlds shows what screens do to the reading brain and to empathy. Its free book page lets visitors watch the problem happen, and then practice the cure.

Ruth, 67
Ruth's feed

Hometown Memories

Sixty years of fireworks over the lake. My father took me; I took my kids.

Tradition Matters

A drone show is a screensaver in the sky. Fireworks are something you feel in your chest.

Town Square

Next they will want to cancel the parade because it is too loud.

Real Fourth

The people pushing drones have never stood on that beach on a summer night.

Shared 1,900 times most shared

"Fireworks scare dogs." Then keep your dog inside for one night. Unbelievable.

Jordan, 19
Jordan's feed

Clean Skies

Drone shows make no smoke and leave no debris in the lake.

Veteran Friends

Some veterans with PTSD dread loud explosions. A quiet show lets everyone come.

Fire Season Watch

Last summer was dry. Fireworks start grass fires. Why take the risk?

Future Forward

Clinging to fireworks in 2026 is like refusing to use email.

Shared 2,700 times most shared

Some people would rather the hills burn than give up their loud bangs.

Two neighbors, two feeds, the same town question. Neither ever sees the other side's best reasons.

Read the whole book free

Six chapters on the reading brain, the empathy engine, the screen inferiority effect and ethical design, with Listen.

/fractured-words

Cross the bridge

Write the other side's best case; an AI coach says whether they would feel fairly described. GSU never takes a side.

/fractured-words

The NADL Audit

Eighteen plain questions that audit any app or website's design, never the reader.

/fractured-words

History and conversation, one decision at a time

Two new programs teach the skills a divided world needs most: learning from the past without erasing it, and reading more than the words people say.

The Fork in the Road

Stand at five real turning points: the Triangle factory fire, the Titanic's lifeboats, the Dust Bowl, the Tacoma Narrows Bridge and the sleeping pill one FDA reviewer refused. Decide with only what was known then, then see what happened, what it cost and what society changed. The founder's own fork, and a private tool to write yours, close the page.

Belfast, 1911

The lifeboats

You are approving the lifeboat plan for the largest ship ever built, about 46,000 tons, carrying more than 2,000 people. Her davits could carry far more boats than she will. Everyone calls her practically unsinkable.

What you know right now, and nothing more:

- The Board of Trade rule, written in 1894, sets lifeboats by a ship's weight, and tops out at 16 boats for any ship over 10,000 tons.
- Lifeboats are thought of as ferries, to carry people to a rescue ship nearby, not to hold everyone at once.
- Extra boats crowd the deck the first-class passengers walk on.
- Ships on this route have rarely needed their boats.

What do you decide?

Carry 20 lifeboats: more than the law requires.

Carry the legal minimum of 16 and keep the deck open.

Fork in the Road

One Sentence, Ten Channels

From *Every Way We Speak*: keep the words the same and change the other nine channels, from tone and face to time and silence, and watch what the listener actually receives. Then read five everyday scenes and practice the habit the book teaches: ask rather than assume.

Words (fixed) "Take your time."

What the listener receives

Mixed message One story

A mixed message. They hear the opposite: "Hurry up." They will rush, and may stop asking questions.

- Your words say one thing, but **gesture**: glancing at the clock says the time is running out.
- Your words say one thing, but **appearance**: a coat on and keys in hand say you are already leaving.

An honest repair

"Take your time. I do have a meeting at three, so if we need longer, let's pick this up at four." Naming the real limit makes the words true again.

Every channel offers information, not certainty. A listener who sees a mixed message does best to ask, not assume. Cultures differ on space, touch, eye contact and time, so read them with humility.

Tone	Warm and unhurried	Even, ordinary	Sighs, clipped and quick
Face	Soft eyes, a real smile	Relaxed, neutral	Tight mouth, narrowed eyes
Gesture	Open hands, a small nod	Hands at rest	Glancing at the clock
Posture	Turned toward them	Upright, neutral	Turned away, arms folded
Touch	A welcome handshake, accepted	No touch, which is fine	A hand on the shoulder, unasked
Space	Seated at their level	Across a desk	Standing over them
Time	Said right away, unhurried	After a short pause	Said three days late, by text
Appearance	Ready for this meeting	Everyday clothes	Coat on, keys in hand
Silence	A pause that invites a reply	No pause at all	A cold silence afterward

Every Way We Speak

The Generations Table

A kitchen-table conversation for two generations. You do not have to agree. You have to understand.

NEW TO THIS? START HERE

Two people can love each other and still see the world very differently. This card is not about winning. It is about understanding. You will each try to explain the other person's view so fairly that they say, "Yes, that's it." No experience needed, just two chairs, a pencil and about thirty minutes.

HOW IT WORKS

- Put the phones in another room. This only works face to face.
- Choose one question together. Start small: a town question, not a national one.
- Each of you says, in one sentence, which way you lean.
- In your own column, write the OTHER person's best response. Read it aloud. Keep revising until they say, "Yes, that's exactly why."
- Each of you names one thing you agree with and one thing you learned.

THREE RULES FOR A FAIR ARGUMENT

- Describe their view so fairly they would thank you for it.
- Name one thing you agree with, even a small one.
- Name one thing you learned from them.

Rules the philosopher Daniel Dennett credited to the mathematician John von Neumann

PICK A QUESTION

- ☐ Should the middle school ban phones for the whole school day?
- ☐ Should the Fourth of July fireworks become a drone light show?
- ☐ Should Main Street close to cars on Saturdays?
- ☐ Our own question: _____

FIRST PERSON

My name _____

I lean _____

My best case for YOUR side

You said ☐ Yes, that's it ☐ Close ☐ Not yet

One thing I agree with

One thing I learned from you

SECOND PERSON

My name _____

I lean _____

My best case for YOUR side

You said ☐ Yes, that's it ☐ Close ☐ Not yet

One thing I agree with

One thing I learned from you

Try it on screen first! Two Feeds, One Town, at globalsovereignuniversity.org/fractured-words

A kitchen-table conversation for two generations, from Fractured Words, Fractured Worlds.

The Ten Channels Card

Words are only one of ten channels. Before it matters, check all ten.

EVERY WAY WE SPEAK | CHAPTERS 6 TO 9
DR. GENE A. CONSTANT

NEW TO THIS? START HERE

Every time you speak, people read more than your words. They hear your tone, watch your face and hands, notice how close you stand, how long you look to answer, and what your silence says. This card names all ten channels so you can check them before a conversation that matters: a job interview, a hard talk at home, a meeting with a teacher or a doctor.

THREE HABITS

- Match the message to the manner: let all ten channels tell the same story.
- Read with humility: every channel offers information, not certainty.
- When the signals are mixed, ask rather than assume.

A MYTH TO RETIRE

"Only 7% of meaning is words," misreads too small 1967 studies about judging feelings. Words carry the content; the other channels tell people how to take it.

1 Words

Did I choose the clearest words, or the first ones?

2 Tone

Does my voice match what I am saying?

3 Face

What is my face saying before I speak?

4 Gesture

Do my hands help the message or compete with it?

5 Posture

Am I turned toward them, steady and open?

6 Touch

Is touch welcome here? When in doubt, ask.

7 Space

Is this a distance they are comfortable with?

8 Time

Did I answer in a time that says this matters?

9 Appearance

Does how I show up fit this moment?

10 Silence

Have I left room for them to answer?

Read the book free and try One Sentence, Ten Channels at globalsovereignsustainability.org/every-way-we-speak
Global Sovereign University. Different by Design. Better by Mission.

Scan to open the book page.

All ten channels of communication, one question each, from Every Way We Speak.

The Pre-Mortem Card

Imagine your plan has already failed. Then make sure it does not.

HOW TO RUN IT (20 MINUTES)

- Write your plan in one sentence.
- Read the failure line out loud as if it already happened.
- Alone and quietly, list at least five reasons it failed. No arguing yet.
- Read the reasons aloud. Group them into a few themes.
- For each big theme, choose one change you will make now.

FOUR QUESTIONS BEFORE YOU COMMIT

- What problem are we really solving?
- What will it cost, in money and in time?
- When will the cash actually arrive?
- What result would make us stop?

NEW TO THIS? START HERE

Before a big decision, most of us only picture success. A pre-mortem flips that: You pretend it is a year from now and the plan went badly, then you write down why. It feels strange, and that is the point: it lets you see problems while they are still cheap to fix. You do not need a business. It works for a new job, a move, a big purchase or a family plan. Take twenty minutes and an honest pencil.

FROM RISK TO REWARD | CHAPTER 4
DR. GENE A. CONSTANT

Your plan, in one sentence: _____

It is _____ . The plan has failed and cost us. We are shutting it down. What happened? "

WHY IT FAILED (WRITE AT LEAST FIVE)

- _____
- _____
- _____
- _____
- _____
- _____

THEMES AND THE ONE CHANGE WE WILL MAKE NOW

Theme (what kept coming up)	Our change	Who / by when
_____	_____	_____
_____	_____	_____
_____	_____	_____

Decision: ☐ Go ahead as planned ☐ Go ahead with the changes ☐ Wait and test smaller first

Most plans survive their pre-mortem, stronger than before. The point is not to kill ideas. It is to stop paying full price for lessons.

globalsovereignuniversity.org/en/entrepreneurship | Free from Global Sovereign University, a tuition-free 501(c)(3) nonprofit. General education, not financial advice.

Imagine the plan has failed, then fix it while it is cheap. From
From Risk to Reward.

The Owner's Scorecard

Five numbers, once a month. Profit tells you if you can win. Cash tells you if you can stay alive.

FROM RISK TO REWARD | CHAPTERS 7 AND 8
DR. GENE A. CONSTANT

NEW TO THIS? START HERE

A business can make a profit on paper and still run out of money, because bills come before payments. This card keeps five numbers in front of you. You need a calculator, your bank balance and last month's bills. Fill in one column on the same day each month. When a number moves the wrong way two months in a row, that is your signal to act.

HOW TO WORK EACH NUMBER

- Cash in the bank**
What you could spend today.
- Monthly burn**
Money out minus money in, last month. If more came in than went out, write 0.
- Runway**
Cash divided by burn = months you can keep going. If burn is 0, write "no limit." Many owners act when it falls below 3.
- Days to get paid**
Average days from finishing work in money in the bank.
- Gross margin**
(Price minus cost) divided by price. Not the same as markup.

BONUS: YOUR BREAK-EVEN

Fixed costs per month divided by (price minus cost) = sales you need each month just to stay even.
Example: \$2,200 fixed, \$25 price, \$10 cost. $2,200 / 15 = 147$ sales a month, roughly 34 a week. Margin: $15 / 25 = 60\%$.

Practice with your own numbers first: the free Owner's Forecast runs your plan through a thousand possible futures.
