

THE KITCHEN-TABLE CAMPUS

CHECK IT · TEACH IT · PROVE IT

A free guide from Global Sovereign University

Start at globalsovereignuniversity.org/homeschool

Global Sovereign University is a 501(c)(3) nonprofit and book sales are its only income. A purchase is not a tax-deductible donation. This guide is free. Share it with any family.

Your table is a campus.

You do not need a classroom, a degree or a budget to teach your child well. **This guide shows eight free ways GSU helps you check, teach and prove it.**

Eight parts

1. Ask GENO first ————— page 3
A free AI tutor for you and your child, any hour.
2. Where are they, really? ————— page 5
The free Grade Level Check, reading and math, grades 4 to 8.
3. Build the week in one minute ————— page 7
The Kitchen-Table Week Planner and three printable cards.
4. Teach from a script ————— page 9
Twenty-nine free Mentor's Edition lesson plans, 30 minutes each.
5. Read it. Understand it. ————— page 11
Free classes with three ways to read and every part read aloud.
6. Earn the certificate ————— page 13
A final check graded on our server, and a serial number anyone can check.
7. Run a one-day market ————— page 15
The kids run a real shop for a day. Plan page included.
8. Prove it: the Record Kit ————— page 18
Turn high school hours into credits and print a real transcript.

How to use this guide: every page has a QR code. Point your phone camera at the square to open that free tool, or type the address under it. No account. No fee. Start with Part 1 tonight, or start anywhere.

ASK GENO FIRST

A TUTOR AT THE TABLE, ANY HOUR

Ask GENO first, free
globalsovereignuniversity.org/homeschool

A tutor at the table, **any hour.**

Stuck on a lesson at nine at night? A child who won't read? A form you don't understand? **Ask GENO the way you would ask a friend who teaches.**

Three ways to ask

BUTTON 1

I'm the parent

Ask about a plan, a stuck child or the paperwork. GENO answers, then points you to the right free tool on the homeschool page.

BUTTON 2

My child has a question

Switch the button and let your child ask in their own words, with you nearby.

OUT LOUD

Rather talk?

GENO speaks too. Tap the call button in the bottom corner of the page and ask out loud.

Good first questions

"My 9-year-old says reading is boring. Where do I start?"

"What should a school week look like for a 12-year-old?"

"How can I explain fractions at the kitchen table?"

"What records should I keep once my child reaches high school?"

What GENO is

GENO is an AI tutor, not a teacher. **You are the teacher at your table.** GENO answers and coaches, at any hour, for free, so you are never teaching alone.

Keep it private. Please don't type your child's full name or private details. GENO is not medical or legal advice. If an answer seems wrong, check it, and let your child see you check. That is a lesson too.

WHERE ARE THEY, REALLY?

START WHERE YOUR CHILD IS

Take the free Grade Level Check

read.globalsovereignuniversity.org/grade-level-check.html

Start where your child **really** is.

A report card can be kind and still be wrong. **A free, private check tells you the highest grade level where your child's answers hold up.**

9 in 10

parents believe their eighth grader is at or above grade level

3 in 10

eighth graders test proficient in reading, and about the same in math

Parent beliefs come from national survey research. Test results come from the Nation's Report Card (NAEP). Both are cited on the check's page.

Three parts, about ten minutes each

1. Reading

Fifteen questions, grade 4 through 8. The passages get harder until they stop holding.

2. Math

Fifteen questions, grade 4 through 8. Same ladder, same honest stopping point.

3. Writing

One prompt and a scoring guide you apply yourself. A machine cannot grade writing honestly.

Then start there

If the check says your sixth grader reads at a fourth-grade level, start with fourth-grade reading. That is not a step back. **A gap closes from where it begins.** Grown-ups can take it too, alone, with nobody told.

Honest about what it is. This is a screener, not a standardized test. It does not meet any state's testing rule; if your state requires a test, use an approved provider. Nothing is sent anywhere: no account, no email, no results to a school or to us. A tired child or a bad ten minutes can move a score, so if a result surprises you, try again another day.

BUILD THE WEEK

IN ONE MINUTE

Build your week free

globalsovereignuniversity.org/homeschool

Plan the whole week in one minute.

Sunday night, coffee in hand. **Type in your children, press one button, and the week is planned.**

Four steps

1. Add each child

Up to four. Give a first name, an age, and where they are in reading, from “learning the sounds” to “reads almost anything.”

2. Pick the hours

School hours per day, from 1 to 5. A short, steady day beats a long, ragged one.

3. Build the plan

Each child gets Monday to Friday: reading at their stage, math, one Mentor’s Edition lesson that fits their age, and free choice.

4. Next week

Change the week number and the lessons rotate to new ones.

Three cards to print and tape up

CARD 1

Weekly Plan Card

The plan you just built, on one page for the fridge.

CARD 2

Blank Weekly Plan Card

Monday to Friday with rows for reading, math, the lesson and free choice. Fill it in by hand.

CARD 3

Reading Log Card

Fourteen lines: the date, the title, minutes read, and one sentence about what happened.

Keep the week going

Tape the card where everyone can see it. Let your child tick each box when it is done; a full row of ticks feels good. Missed a day? Move it to Friday instead of piling it on top of tomorrow. **A plan you keep beats a perfect plan you drop.**

Private by design. Your entries are saved only on your own device, in your own browser. Nothing is sent to GSU or anyone else. Free, no account.

Build this week’s plan now.
Global Sovereign University
globalsovereignuniversity.org/homeschool (Step 2)

TEACH FROM A SCRIPT

THIRTY MINUTES. NO PREP.

Download a lesson plan free
globalsovereignuniversity.org/homeschool

You do not need to be a “real teacher.”

Twenty-nine Mentor’s Edition lesson plans, free to download. **Each one is scripted, takes 30 minutes, and needs about two minutes of setup.**

Every lesson runs the same five steps

1. The Hook

3 min

One question to get them curious.

2. Play Together

12 min

Climb the free game side by side. Read each card aloud, then everyone votes.

3. The Talk

8 min

Three questions, with what to listen for.

4. Solo Climb

5 min

Your child answers alone, at their own pace.

5. The Takeaway

2 min

One idea to keep, and the badge.

The words you say are printed in a gold box, so you can read them exactly. Short notes underneath tell you what to do if a lesson stalls. Finishing all five steps earns a Bronze badge; homework during the week earns Silver and Gold.

All twenty-nine

- | | | |
|-----------------------------|----------------------------|----------------------------|
| 1 The Steward’s House | 11 The Four Sciences Climb | 21 The Living World |
| 2 The Manipulation Gauntlet | 12 The Trades Climb | 22 The Family Code |
| 3 The Spelling Forge | 13 The EQ Climb | 23 The History Detective |
| 4 The Money Climb | 14 The Sovereign Mind | 24 The Living Map |
| 5 The Junior Money Climb | 15 The Civic Virtue Climb | 25 The Citizen’s Climb |
| 6 The Founders Climb | 16 The World Climb | 26 The Inner Compass |
| 7 Leadership & Influence | 17 The Vitality Climb | 27 When No One Is Watching |
| 8 The Lawgivers Climb | 18 The Sound Map | 28 The First Americans |
| 9 The Thinkification Climb | 19 The Kitchen Lab | 29 Old Glory |
| 10 The Plain Law Climb | 20 The Civic Workshop | |

Each plan names its ages and needs only a screen, the free game, and the page itself. The plans are free to download and print, so print as many as you like.

Open the lesson plans.
Global Sovereign University
globalsovereignuniversity.org/homeschool (Mentor’s Edition)

READ IT. UNDERSTAND IT.

THREE WAYS TO READ, ANY PART ALOUD

Start a free class

globalsovereignuniversity.org/homeschool

One book, **three ways to read it.**

Each homeschool book is becoming a free class, one lesson per chapter, written for elementary school. **Two classes are complete today.**

Every lesson has four parts

READ

Three levels

Younger reader, older reader, or the book's own words. Switch any time.

LISTEN

Read aloud

Tap any part and hear it read, using the voice built into your device.

DO

Hands on

Activities and a family task to try at home.

EARN

Check it

A short check on every lesson, then a certificate for the book.

Open now

Civic Literacy for Kids

10 lessons · /civic-literacy-class

The three branches, the Bill of Rights, voting, reading the news, where tax money goes, local heroes, how to argue well, how laws work, how to help, and being a good neighbor online.

Old Glory

10 lessons · /old-glory-class

How the flag was born and what its parts mean, how it grew, the Pledge, treating the flag right, the days we fly it, the people behind it, what patriotism really means, and your turn to carry it.

Progress is kept on your device only. More classes open one at a time.

Keep a copy. Both books are on Amazon. Book sales are the only thing that keeps these classes free. Global Sovereign University is a 501(c)(3) nonprofit and book sales are its only income. A purchase is not a tax-deductible donation.

See the classes.

Global Sovereign University
globalsovereignuniversity.org/homeschool (the classes)

EARN THE CERTIFICATE

A SERIAL ANYONE CAN CHECK

Take a class, then its final check
globalsovereignuniversity.org/homeschool

Proof that anyone can check.

Each class ends with a final check. **Pass it, and your child earns a certificate with a serial number anyone can look up.**

How the final check works

1. Thirty questions

Three from each of the ten lessons.

2. Graded on our server

The answers are never on the page, so there is nothing to peek at.

3. Pass at 80 percent

Earn the certificate with its own serial number.

4. Not yet? Try again

The result points to what to review. Every retry is free.

Anyone can check it

A grandparent, a co-op leader or a future school can type the serial number at **globalsovereignuniversity.org/verify** and see that it is real. Older learners will find more free certificates at **globalsovereignuniversity.org/certification**, including Reading Comprehension and the trades.

CIVIC LITERACY

Final check

globalsovereignuniversity.org/civic-literacy-exam

OLD GLORY

Final check

globalsovereignuniversity.org/old-glory-exam

Honest about what it is. A GSU certificate shows that your child read the book and understood it. It is not a school grade, a credit or a diploma, and GSU is not an accredited school. On a high school record, list it as outside proof (see Part 8).

Check any GSU certificate here.
Global Sovereign University
globalsovereignuniversity.org/verify

RUN A ONE-DAY MARKET

THE KIDS ARE IN CHARGE

Practice first: Open for Business
globalsovereignuniversity.org/open-for-business

For one day, **the kids run the shop.**

Choose something to make. Set a price. Sell it. Count the money. **One market day teaches lessons a worksheet cannot.**

Who does what

KIDS

Run it

Pick the product, make it, set the price, make the sign, greet buyers, make change, count the money.

GROWN-UP

Back it

Check the rules, drive, keep everyone safe, and sit nearby. Help only when asked.

The money math

Cost: a batch of cookies costs \$6 to make and gives 24 cookies. $\$6 \div 24 = 25$ cents each.

Price: sell them for 50 cents each.

Profit: sell all 24 and you take in \$12. Take away the \$6 cost, and **\$6 is profit.**

Ask your child: what if only 10 sell? (10×50 cents = \$5. That is less than the \$6 cost, so the shop lost \$1.) That one question teaches more than a chapter.

Practice first, free

Open for Business: The Main Street Game lets your child pick a shop, run it month by month, and handle surprise cards before a real dollar is on the line.

A grown-up checks the rules first. Rules for selling differ by town and state. Some places need a permit, and food often has its own rules. Check before market day. The plan on the next page has a box to tick.

My Market Day Plan

Fill it in by hand. Keep it. It is your first business record.

Two weeks before

What I will sell: _____

Who will buy it: _____

Where and when: _____

☐ A grown-up checked the selling rules for our town.

Count my costs

What I need	What it cost
	\$
	\$
	\$
	\$
Total cost	\$

How many I will make: _____

Cost for each one (total cost ÷ how many): \$ _____

My price for each one: \$ _____

Profit for each one (price – cost for each): \$ _____

One week before

☐ Make a sign with the name and the price.

☐ Practice saying hello and making change.

☐ Make one test batch. Fix what went wrong.

Market day

Starting cash in the box (coins and small bills): \$ _____

Tally a mark for every sale:

--	--	--	--	--	--	--	--

After the market

Money in the box at the end: \$ _____

Minus my starting cash = sales: \$ _____

Sales minus total cost = **profit**: \$ _____

What sold best: _____

Next time I will change: _____

Who I will thank: _____

Practice with the free game first.
Global Sovereign University
globalsovereignuniversity.org/open-for-business

PROVE IT

HOURS BECOME CREDITS

Open the Record Kit free
globalsovereignuniversity.org/record-kit

Turn your hours into a real transcript.

For the high school years. **Log hours as you go, and the Record Kit turns them into credits and prints three pages.**

Hours become credits

You choose how many hours make one credit: **120, 150 or 180**. That is the common range, and the choice is your family's. A course earns at most one credit from its hours, so a long project cannot quietly fill a whole transcript.

Three pages, each one optional

PAGE 1

Transcript

Courses, grades, credits and grade point average. Honors adds 0.5 and AP or dual enrollment adds 1.0 if you want a weighted average.

PAGE 2

Course descriptions

What each course covered and how it was graded, in plain words a reader can trust.

PAGE 3

Outside proof

Tests, classes taken elsewhere, and GSU certificates with the address to check each serial.

Print opens a clean page with nothing from the website on it. Everything is saved only on your device. Save a backup file and you can open it again on another computer.

Good to know. In the United States a homeschool parent may write and sign their child's transcript. Rules differ by state, so check yours. Some colleges also ask for test scores or outside proof, which is what page 3 is for. This is a record-keeping tool, not legal advice.

Check it. Teach it. **Prove it.**

A first week that takes about two hours of your time.

Your first week

1. Tonight

Ask GENO one real question.
(Part 1)

2. Tomorrow

Take the Grade Level Check, one subject a day.
(Part 2)

3. Sunday

Build the week and print the card.
(Part 3)

4. Monday

Teach one 30-minute lesson, word for word.
(Part 4)

5. All week

One class lesson a day, plus a Reading Log.
(Parts 3, 5)

Legal in all fifty states. Homeschooling is allowed everywhere in America, but the rules differ: some states ask for a notice, some for tests or records. Check your own state's rules before you begin, and keep a simple record from day one.
