

Sponsors large and small make it possible for Wildlife Rescue to provide expert medical and rehabilitative care to injured and orphaned wildlife.

Your support has a direct impact: It's because of corporate generosity, we are able to provide wildlife with a second chance at life.

To get started, check out the sponsorship opportunities inside, or get in touch with our Fund Development Officer, Coco Fralic to discuss your ideas.

MISSION

To provide leadership in rehabilitating wildlife and in promoting the welfare of wild animals in the urban environment.

WHO WE ARE

Since 1979, Wildlife Rescue has treated over 140,000 animals from across BC.

Located on the shores of Burnaby lake, we operate at a regional level to provide species-specific care for injured, orphaned and pollution impacted wildlife. Our goal is to provide a second chance at life to all animals in need.

Through the generous support of our community partners and sponsors, we run several inter-connected programs to deliver on our mission. These include a unique Rescue-Transport-Release program, education and outreach, foster family placements, conservation initiatives and a Wildlife Support Centre that is open to the public year-round.

CANADA GOOSE GOSLINGS

IMPACT

As the busiest wildlife rehabilitation centre in Western Canada, the Wildlife Rescue Hospital is a leader in wildlife rehabilitation across Canada.

365 days a year, our dedicated team of experts provide the highest-quality medical care, completely free of charge to the public, ensuring every wild animal in need receives the best treatment possible.

One year of impact at Wildlife Rescue, in 2023:

4,991

injured, orphaned and pollution-impacted patients were admitted and treated at the Wildlife Rescue Hospital

treated patients as far away as:

- William's Lake
- Vanderhoof
- Haida Gwaii
- Calgary

39,848

interactions through our Wildlife Support Centre provided the public with essential support for local wildlife

109

new volunteers joined Wildlife Rescue, donating their time and skills to support our mission

8,785

email subscribers getting exclusive access to wildlife patients and organizational updates

131,535

unique website users getting valuable info about helping wildlife
