SEG FRAMED
GRAPHIC SOLUTIONS

SUPERCOLOR™ DIGITAL

Our sleek, high-impact light boxes combine advanced LED illumination with precision-engineered custom framing to deliver vibrant, evenly lit graphics that command attention. Each display is produced using our premium backlit fabric, Murray Lite, designed to enhance brightness, color vibrancy, and overall visual clarity.

The result is a rich, luminous presentation that elevates brand visibility in any environment. Designed for easy installation and built with eco-conscious materials, these solutions offer long-lasting performance with minimal maintenance.

All light box systems are ETL listed and UL certified, ensuring they meet the highest safety and quality standards.
