Residential, Commercial and Private Estate Security

Aurum has extensive experience in delivering tailored security solutions across the residential, commercial, and private estate sectors, working in partnership with some of the UK's leading property and estate management companies.

Whether you require a comprehensive security assessment to identify risks and determine the most effective protective measures, or a fully integrated security solution combining highly trained security personnel with advanced security systems, Aurum provides a bespoke service designed around your specific requirements. Our holistic approach ensures every solution is tailored to deliver the highest standards of safety, professionalism, and peace of mind.

Aurum facilities is a full-service facilities business able to deliver our clients the full in-house package, to support our specialist sectors in Hotel, Hospitality, Residential, Commercial and Private Estates.

We are not a one size fits all provider, and each client has a bespoke package made for their needs.

Aurum Can Deliver

Security Systems and Technology - using the most advance AI powered, cloud-based solutions to future proof your systems and protect your assets.

Mechanical, Electrical and Full Maintenance Support - end-to-end solutions for the design, construction, installation, and maintenance of M&E systems.
