Turn trips into useful information.

For work vehicles, day-to-day visibility starts with the journeys and activity your tracking service records.

01 **Vehicle locations**

Check reported vehicle positions through the EZY GPS app or web portal.

02 **Journey history**

Review recorded trips to understand where vehicles have travelled.

03 **Geofences and alerts**

Set location zones and use alerts supported by your device and configured service.

04 **Daily work reports**

Review the working day with daily reports included in existing EZY GPS plans at no extra charge.

Reporting and alerts depend on recorded data and configuration. Battery reporting schedules and connected-video services are specified separately for the selected product.

LET US HELP YOU CHOOSE

Your vehicles. Your assets. Your setup.

A good recommendation starts with the way you work.
Tell us about the assets, locations and visibility you need.

- 01 What will you track, and how many?
- 02 Where will it travel or be stored?
- 03 How will the device be powered and fitted?
- 04 Do you need location, reports or recorded video?
