EZYH1

Discreet tracking. Everyday visibility.

Keep a clearer view of your work vehicles with a tracker fitted to the vehicle electrical system. The EZYH1 suits a permanent installation for vehicles that stay in your business.

4G
Connectivity

Wired
Permanent fit

300 mAh
Backup battery

01 A discreet installation

Fit the compact device out of sight with a suitable professional installation.

02 Vehicle-powered tracking

Use vehicle power for regular tracking, with a built-in backup battery.

03 Useful vehicle activity

Review journeys and supported ignition, movement and power-loss events.

SUITS Work vehicles and fleets where a discreet, permanent installation is preferred.

Installation	Hardwired to vehicle electrical system
Device supply voltage	9-90 V DC; installation kit limits may differ
Backup battery	300 mAh, 3.7 V
Dimensions	82 x 30.5 x 14.8 mm
Weight	38 g
Connectivity	4G LTE Cat.1
SIM format	Micro-SIM
Ignition input	ACC detection
Enclosure rating	IPX5
Operating temperature	-20 to +75 degrees C

Getting started

Have your EZYH1 fitted by a qualified automotive installer. Installation is arranged and paid for separately. Your installer will check the vehicle supply and use the instructions for your supplied kit.

The standard installation provides tracking only. Ask about vehicle suitability and separate fitting requirements if you need an immobiliser.

Location updates need power, satellite reception and mobile coverage. Features and alerts depend on your device, installation and service.
