

Company Overview

Kemeski Systems is a veteran-owned cybersecurity and IT security firm dedicated to protecting organizations that serve our communities.

We deliver practical, high-integrity security solutions that help businesses, clinics, government agencies, and contractors operate with confidence in today's evolving threat landscape. Built on Zero Trust principles and rooted in ethical, mission-driven service, Kemeski provides protection designed for real-world environments , not complexity.

Core Competencies

- **Staff Augmentation:** Cleared IT & cybersecurity personnel supporting daily operations, project delivery, and mission-critical technical roles.
- **Cloud Computing:** Cloud migration, cloud infrastructure management, cloud-based solutions.
- **Cybersecurity:** Risk assessment, vulnerability management, security implementation, incident response.
- **AI Security and Productivity solutions:** Secure AI implementation, AI threat detection, automation, governance, and productivity enhancement for modern organizations.
- **IT Consulting:** Strategic planning, technology roadmaps, IT governance, project management.
- **Managed Services:** IT support, network monitoring, system administration, help desk services.

Past Performance

- **Public Safety & Law Enforcement:** Implemented CJIS-aligned controls, upgraded secure infrastructure, enforced MFA, and strengthened incident response readiness.
- **State & Local Government:** Supported endpoint modernization, compliance road mapping, security monitoring, and Zero Trust implementation.
- **Healthcare & Clinics:** Delivered HIPAA-aligned assessments, audit documentation, cloud security hardening, and secure email/backup deployment.
- **Education & Professional Services:** Provided cybersecurity assessments, compliance frameworks, and backup/identity protection for regulated environments.

Key Differentiators

- **Public-Sector Experience**
10+ years securing law enforcement, state/local systems, public-safety networks, and government operations.
- **Zero Trust at the Core**
Identity, device, data, and network controls designed for modern threats.
- **Halal-Compliant Business Practices**
No interest-based fees, full transparency, and ethics-first service delivery.
- **Veteran-Owned & Mission-Driven**
Built on integrity, discipline, and real-world operational experience.
- **Compliance-Ready Documentation**
Deliverables aligned with government audits and federal contracting requirements.
