

Shannon Fletcher

General Manager, Electrical

As General Manager, Shannon Fletcher brings 28 years of electrical experience, all with Stewart Richey. Beginning as an Electrical Helper in 1998, Shannon advanced through the field while completing ABC Electrical School, earning his Journeyman's License, and later obtaining his Kentucky Master Electrical License. His background spans field installation, high-voltage work, estimating, project management, and division leadership, giving him a strong understanding of the electrical trade from project planning through final installation.

Project Experience

WKU Fieldhouse - Bowling Green, KY

Stewart Richey Electrical completed the electrical systems installation for the Western Kentucky University Fieldhouse project. The work required coordination with other trades and project teams to support the facility's overall construction schedule and operational needs. Shannon Fletcher led the division's involvement with a focus on quality installation, safety, and dependable system performance.

Edmonson County High School LAVEC - Brownsville, KY

For the Edmonson County High School LAVEC project, Stewart Richey Electrical provided the electrical systems installation for the facility. The project required coordination within an educational construction environment, with attention to schedule, safety, and system reliability. Shannon Fletcher oversaw the electrical scope to help deliver a complete installation aligned with project requirements.

WKU High Voltage Projects - Bowling Green, KY

Stewart Richey Electrical has supported various high-voltage projects throughout Western Kentucky University's campus. The work has included installing new high-voltage lines, reworking existing high-voltage infrastructure, and completing duct bank and manhole work across campus. These projects require careful planning, safety awareness, and coordination to support the university's ongoing infrastructure needs.

Cannon Automotive Solutions - Bowling Green, KY

Stewart Richey Electrical has completed various projects for Cannon Automotive Solutions, including installation of the complete electrical system for the main building as well as multiple additions and building modifications over the years. The ongoing work has required consistency, coordination, and a strong understanding of the facility's electrical infrastructure. Shannon Fletcher has led the division's support across these projects to help meet the customer's changing operational needs.
