

Guide for Parents

Common Dental Emergencies in Children

Knocked-Out Teeth

- Quickly locate the knocked-out tooth.
- Gently rinse it with water; do not scrub
- Attempt to place it back in the socket.

Chipped or Broken Teeth

- Rinse the mouth with water.
 - Apply a cold compress to reduce swelling.
- Avoid hard foods until your dentist evaluates the damage.

Dental Pain or Abscess

- Use a cold compress to relieve pain.
- Painful swelling may indicate an infection.
- Seek immediate dental care if pain persists.

Chipped or Broken Teeth

- Rinse the mouth with water.
- Apply a cold compress to reduce swelling.
- Avoid hard foods until your dentist evaluates the damage.
