RE: Regulatory Information Request - Conflict Minerals Statement

As a responsible steward in the aluminum and aluminum products industry, we are aware of the humanitarian concerns in the Democratic Republic of the Congo (DRC), and the exploitation of resources in that region. Additionally, we recognize the “Conflict Minerals Rule” issued under Section 1502 of the 2010 Dodd-Frank Act regarding the exploitation of mineral resources and human labor. We condemn these abuses especially as they relate to mining for Tungsten, Tin, Tantalum, and Gold (also known as 3TG).

### **Conflict Minerals:**

Through due diligence research across Tower’s supply base and internal processes, Tower Extrusions declares there is no intentional use of any DRC (or adjoining countries) sourced conflict minerals (tantalum, tin, gold, or tungsten) or DRC conflict mineral based chemicals in the products manufactured and supplied to Tower Extrusion’s customers, nor do we have any information that our suppliers are using DRC sourced conflict minerals in their production processes.

We trust this information meets your current needs and thank you for your continued interest in Tower Extrusion’s products.

Sincerely,  
Todd Grant  
Quality
