

uRGS GACI SPONSORED TESTING PROGRAM TEST REQUISITION FORM

GENEDX
PROGRAM
CODE:

STP-GACI

Requirements (all 6 must be met)

The BioMarin GACI Sponsored Testing Program is available only to patients:

<input type="checkbox"/> Patients are between 0 and 12 months of age	<input type="checkbox"/> Must consent to sharing de-identified data with BioMarin
<input type="checkbox"/> Provided evidence of arterial calcification from pre-natal or post-natal imaging. Includes calcification of the aorta, coronary arteries, pulmonary artery, iliac arteries, renal arteries, mesenteric arteries, or carotid arteries	<input type="checkbox"/> Ordering Provider must be authorized under applicable law to order genetic testing in the United States
<input type="checkbox"/> Must not have had prior genetic testing performed by a clinical laboratory which explained the patient's symptoms	<input type="checkbox"/> Must have consented to the mandatory data sharing practices set forth in the Informed Consent (IC) section

All sections on this page are required unless otherwise specified.
Incomplete information could result in a delay of testing.

PATIENT INFORMATION

First Name		Last Name	
Sex Assigned at Birth: <input type="radio"/> Male <input type="radio"/> Female		Date of Birth (mm/dd/yy)	
Patient Karyotype (if known): _____			
Gender Identification (optional): _____			
Email			
Address			
City	State	Zip Code	
Phone (mobile preferred)		Is this patient deceased? <input type="radio"/> Yes <input type="radio"/> No Deceased Date: _____	

SAMPLE INFORMATION

Date Sample Collected (mm/dd/yy)		Medical Record #	
<input type="radio"/> Blood (peripheral) <input type="radio"/> Other (including buccal, cord blood, and isolated DNA; call lab and specify source): _____			
Patient has had a blood transfusion <input type="radio"/> Yes <input type="radio"/> No		Date of Last Transfusion: _____ <i>(2-4 weeks of wait time is required for some testing)</i>	
Patient has had an allogeneic bone marrow transplant <input type="radio"/> Yes <input type="radio"/> No <i>Fibroblasts are required for patients who had an allogeneic bone marrow transplant. Rapid and ultraRapid tests are not suitable for patients who have had an allogeneic bone marrow transplant. See www.genedx.com/specimen-requirements for details.</i>			

ORDERING PROVIDER ATTESTATION

By signing this form, the ordering provider attests that (i) he/she authorizes and directs GeneDx to perform the testing indicated; (ii) he/she is the ordering provider and is authorized by law to order the test(s) requested; (iii) any test(s) requested on this Test Requisition Form ("TRF") are reasonable and medically necessary for the diagnosis or treatment of a disease, illness, impairment, symptom, syndrome or disorder; (iv) the test results will determine the patient's medical management and treatment decisions of this patient's condition on this date of service; (v) the patient is eligible for this Genetic Testing Program (the "Program") and (vi) the patient or the individual/family member authorized to make decisions for the patient (collectively, the "patient"), in addition to any relatives, when applicable, has been supplied with information regarding genetic testing, and has consented to undergo genetic testing in connection with the Program and the data practices identified in the Informed Consent section of this TRF; (vii) the full and appropriate diagnosis codes are indicated to the highest level of specificity; (viii) he/she will not seek reimbursement from any third party, including but not limited to federal healthcare Programs if testing is covered by GeneDx and will inform the patient of the same; (ix) the organization and contact information for the ordering provider and any other healthcare provider(s) listed on this TRF may be shared with third parties that may contact the ordering provider and other healthcare providers listed on this TRF directly in connection with the Program, and that they have made the patient aware that third parties may contact their ordering provider regarding de-identified information gathered through the Program.

- Secondary Findings Opt-out.** Check this box if you do not wish to receive ACMG Secondary Findings (Full Exome Sequencing and Genome Sequencing Tests ONLY; not for Xpanded® or Slice tests).
- New York Retention Opt-In.** By checking this box, I confirm that the patient is a New York State resident who gives permission for GeneDx to retain any remaining sample longer than 60 days after testing has been completed.
- Patient Research Opt-Out.** By checking this box, I confirm that the patient wishes to opt out of being contacted for research studies.
- Health Information Exchange Opt-In.** Check this box if your patient resides in CA, FL, MA, NV, NY, RI, and VT and wishes to opt-in to having their information shared for Health Information Exchange participation.
- Health Information Exchange Opt-out.** Check this box if your patient resides in any other US state or territory and wishes to opt-out of participation in Health Information Exchange.

Signature of Ordering Provider

PRELIMINARY/PROVISIONAL RESULT CONTACT

- Provide preferred contact information for receiving preliminary/provisional results and/or testing updates below.
- Preliminary reports for rapid and ultra-rapid genome sequencing will only be sent to the preliminary contact listed below.
- Final reports will be sent to both the ordering provider(s) listed above and the preliminary contact(s) listed below.

Same as ordering provider contact above

First Name	Last Name	Date of Birth
------------	-----------	---------------

GENOME SEQUENCING

To avoid delays with the expedited turnaround time, use of the GeneDx **ultraRapid** shipping bag with the provided **FedEx First Overnight** shipping label is required. If you need a shipping label or ultraRapid bag, contact your account team (regional account executive or client success manager) or email support@genedx.com with "ultraRapid" in the subject line.

URGb GenomeDx™ ultraRapid, proband

FAMILY MEMBER SAMPLES TO BE INCLUDED IN TESTING

FAMILY MEMBER INFORMATION MUST BE PROVIDED BELOW AND SAMPLES SHOULD BE RECEIVED WITH THE PROBAND'S SAMPLE FOR INCLUSION IN THE TEST.

Family members will not receive a separate report.

Biological Mother	First Name	Last Name	DOB	<input type="radio"/> Asymptomatic <input type="radio"/> Symptomatic <input type="radio"/> At GeneDx (Accession #: _____) <input type="radio"/> Not available
	First Name	Last Name	DOB	<input type="radio"/> Asymptomatic <input type="radio"/> Symptomatic <input type="radio"/> At GeneDx (Accession #: _____) <input type="radio"/> Not available
	Relationship to Proband			<input type="radio"/> Asymptomatic <input type="radio"/> Symptomatic <input type="radio"/> At GeneDx (Accession #: _____) <input type="radio"/> Not available

CLINICAL INFORMATION (DETAILED MEDICAL RECORDS MUST BE ATTACHED)

Relevant clinical records are required at the time of sample submission to ensure the information is included in data analysis.

Genes of interest (limit to 10):	Differential diagnosis:	Relevant Clinical Findings (Important for analysis and interpretation of molecular variants):
----------------------------------	-------------------------	---

FAMILY HISTORY*

*This section is not intended for ordering a targeted variant testing report.

No Known Family History Pedigree Attached Adopted

Relationship	Maternal	Paternal	Relevant History	Age at Dx
1	<input type="radio"/>	<input type="radio"/>		
2	<input type="radio"/>	<input type="radio"/>		
3	<input type="radio"/>	<input type="radio"/>		

PREVIOUS GENETIC TESTING*

*This section is not intended for ordering a targeted variant testing report.

Personal or family history of genetic testing No Yes (If yes, please complete all fields below)

Relation to patient (self, sibling, etc.), Genetic Test(s) and Result (e.g. positive, negative, etc.). If relative was tested at GeneDx, please also provide their accession #:

If patient or relative(s) were found to have a positive or VUS result on prior testing, please provide details below. Indicate any Variants of Interest[‡] via the checkbox below.

Relation (self, sibling, etc.)	Gene	Transcript #	c./p. (SNV) or exon # (CNV)	Build, coordinates (CNV)	Variant of Interest [‡] ?
1					<input type="checkbox"/>
2					<input type="checkbox"/>
3					<input type="checkbox"/>

Required for sequence variants: gene, c./p., transcript #

Required for CNVs: gene, transcript #, exon # QR build, coordinates

Abnormal karyotype, FISH, or other results:

[‡] For certain tests, GeneDx **may** be able to specifically comment upon the presence or absence of previously identified variant(s) of interest in the report. Complete variant information must be provided in the table above at the time the test order is placed. If you do not complete the table above and check off that a previously identified variant is a variant of interest, it will not be possible to comment upon the presence or absence of the variant in the report retrospectively. This service is not applicable to targeted variant testing.

INFORMED CONSENT

First Name	Last Name	Date of Birth
------------	-----------	---------------

For the purposes of this consent, “I”, “my”, and “your” will refer to me or to my child, including my unborn child, if my child is the person for whom the healthcare provider has ordered testing.

PURPOSE OF THIS TEST

The purpose of this test is (a) to see if I may have a genetic variant or chromosome rearrangement causing a genetic disorder; or (b) to evaluate the chance that I will develop or pass on a genetic disorder in the future. If I already know the specific gene variant(s) or chromosome rearrangement that causes the genetic disorder in my family, I agree to inform the laboratory of this information.

WHAT TYPE OF TEST RESULTS CAN I EXPECT FROM GENETIC TESTING?

1. **Positive:** A change in your DNA was found, which is very likely the cause of your features/symptoms. This is the most straightforward test result, which can be used as the basis to test other family members to determine their chances of having either the disease or a child with the disease.
2. **Negative:** No variants were found to explain your symptoms. This does not mean that you do not have a genetic condition. It is still possible that there is a genetic variant not found by the test that was ordered. Your healthcare provider or genetic counselor may discuss more testing either now or in the future.
3. **Variant of Uncertain Significance (VUS):** A change in a gene was found. However, we are not sure whether this variant is the cause of your symptoms/features. More information is needed. We may suggest testing other family members to help figure out the meaning of the test result.
4. **Unexpected Results (ACMG Secondary Findings):** In rare instances, this test may reveal an important genetic change that is not directly related to the reason for ordering this test. For example, this test may find you are at risk for another genetic condition I am not aware of or it may indicate differences in the number or rearrangement of sex chromosomes. We may disclose this information to the ordering healthcare provider if it likely affects medical care.

Because medical and scientific knowledge is constantly changing, new information that becomes available may supplement the information GeneDx used to interpret my results. Healthcare providers can contact GeneDx at any time to discuss the classification of an identified variant.

WHAT IS TRIO/DUO-BASED GENETIC TESTING?

For some genetic tests, including samples from the biological parents and/or other biological relatives along with the patient’s sample can help with the interpretation of the test results. These tests are often referred to as “trio tests” since they typically include samples from the patient and both parents.

Samples from relatives should be submitted with the patient’s sample. Clinical information must be provided for the patient and any relative who submits a sample.

I understand that GeneDx will use the relative sample(s) when needed for the interpretation of my test results and that my test report may include clinical and genetic information about a relative when it is relevant to the interpretation of the test results. I further understand that relatives will not receive an independent analysis of data nor a separate report.

RISKS AND LIMITATIONS OF GENETIC TESTING

1. In some cases, testing may not identify a genetic variant even though one exists. This may be due to limitations in current medical knowledge or testing technology.
2. Accurate interpretation of test results may require knowing the true biological relationships in a family. I understand that if I fail to accurately state the biological relationships in my family, it could lead to incorrect interpretation of the test results, incorrect diagnoses, and/or inconclusive test results. If genetic testing reveals that the true biological relationships in a family are not as I reported them, including non-paternity (the reported father is not the biological father) and consanguinity (the parents are related by blood), I agree to have these findings reported to the healthcare provider who ordered the test.
3. Although genetic testing is highly accurate, inaccurate results may occur. These reasons include, but are not limited to mislabeled samples, inaccurate reporting of clinical/medical information, rare technical errors, or other reasons.
4. I understand that this test may not detect all of the long-term medical risks that I might experience. The result of this test does not guarantee my health and that additional diagnostic tests may still need to be done.
5. I agree to provide an additional sample if the initial sample is not adequate.

PATIENT CONFIDENTIALITY AND GENETIC COUNSELING

It is recommended that I receive genetic counseling before and after having this genetic test. I can find a genetic counselor in my area at www.nsgc.org. Further testing or additional consultations with a healthcare provider may be necessary.

To maintain confidentiality, test results will only be released to the referring healthcare provider, the ordering laboratory, to me, to other healthcare providers involved in my care, diagnosis and treatment, or to others with my consent or as permitted or required by law. Federal laws prohibit unauthorized disclosure of this information. More information can be found at: www.genome.gov/10002077

SAMPLE RETENTION

After testing is complete, my sample may be de-identified and be used for test development and improvement, internal validation, quality assurance, and training purposes. GeneDx will not return DNA samples to you or to referring healthcare providers, unless specific prior arrangements have been made.

I understand that samples from residents of New York State will not be included in the de-identified research studies described in this authorization and GeneDx will not retain them for more than 60 days after test completion, unless specifically authorized by my selection. The authorization is optional, and testing will be unaffected if I do not check the box for the New York authorization language. GeneDx will not perform any tests on the biological sample other than those specifically authorized.

DATABASE PARTICIPATION

De-identified health history and genetic information can help healthcare providers and scientists understand how genes affect human health. Sharing this de-identified information helps healthcare providers to provide better care for their patients and researchers to make new discoveries. GeneDx shares this type of information with healthcare providers, scientists, and healthcare databases. GeneDx will not share any personally identifying information and will replace the identifying information with a unique code not derived from any personally identifying information. Even with a unique code, there is a risk that I could be identified based on the genetic and health information that is shared. GeneDx believes that this is unlikely, though the risk is greater if I have already shared my genetic or health information with public resources, such as genealogy websites.

PARTICIPATION IN A GENEDX PARTNERSHIP PROGRAM

If you are a patient who participates in a GeneDx Partnership Program, you may receive financial assistance through a third-party partner to cover the cost of your genetic test. Eligibility for a GeneDx Partnership Program is contingent on your healthcare provider certifying that you meet the criteria specific to the Partnership Program, including your consent to the sharing of your de-identified test results and related data with GeneDx’s third party partner for that program. If you choose to participate in a GeneDx Partnership Program, you agree that GeneDx may share your de-identified test result data, excluding ACMG secondary findings, with GeneDx’s third-party partner for research or commercial purposes. You acknowledge that GeneDx is compensated for performing your test, and for sharing your de-identified data with its third-party partner. At no time will GeneDx share your identifiable information with a third-party partner without your consent. However, GeneDx may share the contact information of the healthcare providers listed on the Test Requisition Form in accordance with their consent.

INFORMED CONSENT

First Name	Last Name	Date of Birth
------------	-----------	---------------

PATIENT RECONTACT FOR RESEARCH PARTICIPATION

GeneDx may collaborate with other scientists, researchers and drug developers to advance knowledge of genetic diseases and to develop new treatments. If there are opportunities to participate in research relevant to the disorder in (my/my child's) family, GeneDx may contact my healthcare provider for research purposes, such as the development of new testing, drug development, or other treatment modalities. In some situations, such as if my healthcare provider is not available, I may be contacted directly. I can opt out of being contacted directly regarding any of the above activities by having my healthcare provider check the box for Patient Research Opt-Out. Any research that results in medical advances, including new products, tests or discoveries, may have potential commercial value and may be developed and owned by GeneDx or the collaborating researchers. If any individuals or corporations benefit financially from these studies, no compensation will be provided to (me/ my child) or to (my/my child's) heirs.

EXOME/GENOME SEQUENCING SECONDARY FINDINGS

- Applicable only for full exome sequencing and genome sequencing tests
- Does not pertain to *Xpanded*[®] or Slice tests

As many different genes and conditions are analyzed in an exome or genome sequencing test, these tests may reveal some findings not directly related to the reason for ordering the test. Such findings are called "incidental" or "secondary" and can provide information that was not anticipated.

Secondary findings are variants, identified by an exome or genome sequencing test, in genes that are unrelated to the individual's reported clinical features.

The American College of Medical Genetics and Genomics (ACMG) has recommended that secondary findings identified in a specific subset of medically actionable genes associated with various inherited disorders be reported for all probands undergoing exome or genome sequencing. Please refer to the latest version of the ACMG recommendations for reporting of secondary findings in clinical exome and genome sequencing for complete details of the genes and associated genetic disorders. Reportable secondary findings will be confirmed by an alternate test method when needed.

WHAT WILL BE REPORTED FOR THE PATIENT?

All pathogenic and likely pathogenic variants associated with specific genotypes identified in the genes (for which a minimum of 10X coverage was achieved by exome sequencing or a minimum of 15X coverage was achieved by genome sequencing), as recommended by the ACMG.

WHAT WILL BE REPORTED FOR RELATIVES?

The presence or absence of any secondary finding(s) reported for the proband will be provided for all relatives analyzed by an exome or genome sequencing test.

LIMITATIONS

Pathogenic and/or likely pathogenic variants may be present in a portion of the gene not covered by this test and therefore are not reported. The absence of reportable secondary findings for any particular gene does not mean there are no pathogenic and/or likely pathogenic variants in that gene. Pathogenic variants and/or likely pathogenic variants that may be present in a relative, but are not present in the proband, will not be identified nor reported. Only changes at the sequence level will be reported in the secondary findings report. Larger deletions/duplications, abnormal methylation, triplet repeat or other expansion variants, or other variants not routinely identified by clinical exome and genome sequencing will not be reported.

FINANCIAL AGREEMENT AND GUARANTEE

For insurance billing, I understand and authorize GeneDx to bill my health insurance plan on my behalf, to release any information required for billing, and to be my designated representative for purposes of appealing any denial of benefits. I irrevocably assign to and direct that payment be made directly to GeneDx.

I understand that my out-of-pocket costs may be different than the estimated amount indicated to me by GeneDx as part of a benefit investigation. I agree to be financially responsible for any and all amounts as indicated on the explanation of benefits issued by my health insurance plan. If my insurance provider sends a payment directly to me for services performed by GeneDx on my behalf, I agree to endorse the insurance check and forward it to GeneDx within 30 days of receipt as payment towards GeneDx's claim for services rendered.

By signing this form: (i) I acknowledge that I have read or have had read to me the GeneDx Informed Consent document, and understand the information regarding genetic testing; (ii) I have had the opportunity to ask questions about the testing, the procedure, the risks, and the alternatives; (iii) I authorize GeneDx to perform genetic testing as ordered; (iv) I understand that, for tests that evaluate data from multiple family members concurrently, test results from these family members may be included in a single comprehensive report that will be made available to all tested individuals and their healthcare providers; (v) if at any time I or my provider provide an email address or mobile phone number at which I may be contacted, I consent to receiving email or text messages from GeneDx; and (vi) I understand that this consent applies to all future communications unless I request a change in writing.

Secondary Findings Opt-out. Check this box if you do not wish to receive ACMG secondary findings (Full Exome Sequencing and Genome Sequencing Tests ONLY; not for *Xpanded*[®] or Slice tests).

New York Retention Opt-in. By checking this box, I confirm that I am a New York State resident, and I give permission for GeneDx to retain any remaining sample longer than 60 days after the completion of testing, and to be used as a de-identified sample for test development and improvement, internal validation, quality assurance, and training purposes. Otherwise, New York law requires GeneDx to destroy my sample within 60 days, and it cannot be used for test development studies.

Patient Research Opt-out. Check this box if you wish to opt out of being contacted for research studies.

Health Information Exchange Opt-in. Check this box if you reside in CA, FL, MA, NV, NY, RI, and VT and wish to opt-in to my health information to be shared for Health Information Exchange participation.

Health Information Exchange Opt-out. Check this box if you reside in any other US state or territory and wish to opt-out of participation in Health Information Exchange.
