

## SPOTFIRE FUNDAMENTALS TRAINING

**Pre-requisites:** None

**Length:** 2 Days or 4 half-day sessions

Spotfire Fundamentals Training is intended for users who are completely new to Spotfire, have some basic familiarity consuming dashboards or who want to review the basic functionality and graphing capabilities in Spotfire. No prior experience is required. This training will give users everything they need to get started creating their own visualizations and basic dashboards. Attendees are expected to bring their own device with Spotfire Analyst installed. The instructor will provide the necessary files for students to complete the training.

The focus is on hands-on experience allowing students to be fully engaged in the training. Instruction consists primarily of hands-on activities during which students can follow along with the instructor as they walk through the various aspects of the Spotfire application.
