Yvonne Scarabello

Primary Teacher
Crafts, Design, Technology (CDT)

“As a teacher of Crafts, Design, Technology (CDT), I am fascinated by how children use their creativity and curiosity to develop their own ideas. I teach technology, design, and craft processes in a way that makes them understandable, accessible, and hands-on.

It’s important to me to create a learning environment where students can develop a sense of self-efficacy. When children discover that they can shape their own world - with their minds, hearts, and hands - that’s when the most wonderful moments of my lessons happen.”
