Erin Smith

Primary Teacher
Grade 1 & 2

“Engaging students in a variety of learning experiences that challenge their ideology, heighten curiosity, and initiate critical thinking skills is important to developing every child’s independence and creativity. I strive to enable each individual student to create a positive mindset and sense of self, fostering their ability to develop resilience and determination towards their learning as well as their ability to continue being life-long learners.

I am passionate about educational technology, enabling students to ask questions to seek their own answers, and fostering self-belief, confidence, and responsibility.”

Professional Experience
