

# Roll Container

## The roll container for heavier bulk goods

This robust roll container, made from durable galvanised steel, is specifically designed for transporting heavier bulk goods. It can be moved manually or mechanically, and is nestable with other units - saving valuable space during storage or return logistics.

### Nestable

The folding floor pan allows the roll container to be nested with others to occupy a fraction of its volume.

### User-friendly

Can be moved without a pallet jack, which makes it extremely convenient to use.

### Standard dimensions

Half the size of a standard Euro pallet to fit in European standardised logistics systems.

### Characteristics

Material	Steel
Temperature (C°)	-30C to +70C

### Dimensions

External (L x W x H)	800 x 665 x 1900
Internal (L x W x H)	800 x 625 x 1700
Weight (kg)	30,5

### Loading capacity

Dynamic load capacity (kg)	500
----------------------------	-----

### Loading quantities

Units per trailer	66
Units per trailer (folded)	180
