

L1 1208

The plastic heavy-duty pallet

The EURO L1 plastic pallet is the heavy-duty gamechanger for last mile logistics. Made from high-quality PE and reinforced with five metal profiles, it's extra sturdy and maintenance-free. Its 150 mm height matches that of a wooden Euro pallet, making it ideal for intralogistics. Durable and economical—even with high trip rates.

Sustainable

Ultra-durable pallets can be reused for years and outlast wood alternatives.

Compatible

The evenly closed runners ensure the pallet runs smoothly on all standard conveyor technology systems in intralogistics.

Anti-slip strips

To offer a secure hold for loading, even at an inclined position or in damp conditions.

Characteristics

Lid	Optional
Runners	3
Material	PE
Foodgrade	Yes
Temperature (C°)	-30C to +40C

Dimensions

External (L x W x H)	1200 x 800 x 150
