$2,000
Reward per qualifying referral (USD)

90 days
Referral attribution period from submission

60 days
Target reward fulfillment after trial verification

U.S. only
Program available in the United States only

01
Who can participate?

Employees of existing U.S.-based Netradyne customers in good financial standing are eligible to participate, subject to employer policies and program terms. Participants must be at least 18 years old, reside in the United States, have obtained permission from the referred business to share their contact details with Netradyne and for Netradyne to contact them, and have their employer's authorization to participate and receive rewards. Certain restrictions apply, including exclusions for government and public sector employees, employees of Netradyne's resellers, distributors, or other channel partners, and Netradyne employees.

02
What makes a referral eligible?

A referral generally qualifies if the company is a new, U.S.-based prospect that is not already a Netradyne customer, has a fleet of a minimum of 30 vehicles, is not part of an active Netradyne sales opportunity or has previously completed a qualifying Netradyne trial, has not previously been accepted as a valid referral from someone else, and is accepted by Netradyne as a legitimate sales opportunity. To earn a reward, the referred company must begin a qualifying Netradyne trial. All referrals are subject to review and approval.

03
Can I refer a subsidiary or affiliate of an existing Netradyne customer?

Yes! A subsidiary or affiliated company may qualify if it is a separate legal business, is not already a Netradyne customer or have contractual rights under an existing agreement with Netradyne through its parent company, subsidiary, or affiliate, represents a new, eligible sales opportunity, and meets the general eligibility qualifications. Additional locations, divisions, or business units of an existing customer operating under the same legal entity do not qualify. Netradyne will review corporate relationships and existing account activity to confirm eligibility.

04

How do I submit a referral?

Simply complete the referral form above with your contact information and details about the company you're referring. It only takes a minute!

05

Does the person I refer need to know I'm referring them?

Yes. Please make sure your contact is comfortable being introduced to Netradyne and Netradyne contacting them regarding its products and services before sharing their information. A warm introduction is always appreciated!

06

What happens after I submit a referral?

We'll review your submission to confirm eligibility and notify you once it's been reviewed. If accepted, our team will take it from there and connect with the prospective customer. We'll keep you updated as your referral progresses. The review and verification for your submission may take up to five business days.

07

How much can I earn?

You'll earn **$2,000 for each qualified referral that begins a qualifying Netradyne trial**. There's no purchase requirement and no limit to the number of eligible businesses you can refer. Only one reward is available per referred business.

08

How will I receive my reward?

You can choose between a $2,000 personal digital gift card or a $2,000 credit toward your company's Netradyne subscription, subject to eligibility and your employer's policies. Netradyne may require written authorization from your employer prior to awarding any personal digital gift card.

09

When will I receive my reward?

Once your qualified referral officially begins a Netradyne trial and eligibility is verified, we'll process your $2,000 reward. We aim to fulfill rewards within 60 days of verification and will notify you when yours is ready.

10

What if my employer doesn't allow personal gifts?

You may choose a $2,000 credit toward your company's Netradyne subscription instead of a personal gift card, subject to employer authorization, eligibility, and program terms.

11

Are referral rewards taxable?

Personal digital gift cards may be considered taxable income, depending on applicable tax laws. Recipients are responsible for any applicable federal, state, or local taxes and related reporting obligations. Netradyne may request tax documentation as required by law. We recommend consulting a tax advisor with questions about your individual circumstances.

12

Does the company I refer receive anything?

The company you refer will have the opportunity to explore Netradyne's technology through a product trial, subject to qualification. While there's no additional monetary incentive for the referred company, you'll earn $2,000 if they begin a qualifying trial.

13

Can I submit multiple referrals?

Absolutely! There's no limit to the number of referrals you can submit. Each eligible business you refer that begins a qualifying trial can earn a separate $2,000 reward. However, only one reward is available per referred business, regardless of the number of contacts or trials.

14

Can I refer multiple people at the same company?

Yes! You're welcome to introduce us to multiple contacts at the same company. However, referrals involving different individuals at the same business are treated as a single referral opportunity. Only one $2,000 reward is available per qualifying business, even if multiple contacts are submitted.

15

What happens if someone else refers the same company?

If multiple participants refer the same business, priority generally goes to the first valid referral accepted by Netradyne, provided all program requirements are met. Additional referrals to the same business do not qualify for separate rewards.

16

What if my referral doesn't become a customer?

That's okay! Your referral doesn't need to purchase Netradyne. As long as they begin a qualifying trial and meet the program requirements, you'll still earn your $2,000 reward.

17

Is the referral program available outside the United States?

No. The Netradyne Customer Referral Program is currently available only to eligible U.S.-based participants referring qualifying U.S.-based businesses.

18

What qualifies as a Netradyne trial?

A qualifying trial is an official Netradyne-approved product evaluation that has commenced during the Referral Attribution Period, is a legitimate evaluation of Netradyne's products and services, and been verified by our team. Product demonstrations, sales meetings, or trials that have only been scheduled do not qualify for a reward.

19

What is the Referral Attribution Period?

To qualify for a referral reward, the referred company must begin a qualifying trial within 90 calendar days of the original referral submission date. Netradyne may extend this period if an active sales opportunity was established within those 90 days and continues to progress.

For complete eligibility requirements and program details, please review the **Netradyne Customer Referral Program Terms & Conditions**.
