## All Aluminum Bumper Pull Flatbed

Size 96" wide x 18' long (13' plus 5' dove tail)  
(2) 7000 lb axles (15,400 lb GVWR)

**Alum-Line continues to lead the market in heavy-duty aluminum trailers. Our proven design gives users a lightweight trailer capable of hauling the maximum payload.**

Some strength features include:

1. 1/2" thick main frame perimeter
2. 2" tongue and groove extruded floor with built-in crossmembers every 4"
3. 1/2" x 10" extruded c-channel long sills
4. Easy to use flip-over loading ramps
5. Stainless Steel hardware. Enclosed electrical wiring.

Even though this trailer may cost a little more than steel, it will offer three advantages not found with steel and wood.

1. No rust or paint maintenance
2. Lighter weight for fuel savings and greater load capacity
3. High resale value.

Because our trailers are built right they become a valuable asset for many years to come.

All trailers are standard with LED lights, rub rail and stake pockets. Popular options include aluminum wheels, under deck storage boxes, rear stabilizer jacks and recessed swivel tie rings.
