OUR PRODUCT PORTFOLIO

Solutions for internal threads, external threads and quality assurance.

Taps

PRECISION IN INTERNAL TAPS

Designed for through-holes and blind holes featuring material-optimized geometries and high-performance coatings for maximum precision, process reliability, and tool life. Available in the standard product line or as a custom-designed special tool.

Forming Taps

PRECISION IN INTERNAL THREADS

High-performance forming taps for the chipless production of high-strength precision threads. For maximum load-bearing capacity, precise thread geometries and cost-effective tool life in mass production.

Dies

PERFECT EXTERNAL THREADS

Precise external threads with high repeatability. For reliable results, flexible applications and a long service life in both single-piece and batch production.

Gauges

MAXIMUM CONTROL

Reliable quality control with high measurement accuracy for reproducible test results throughout the entire manufacturing process. Thread gauges for consistent quality in production and goods-in inspection, available in standard or customised versions.
