

# BE A SUPERHEALER™

## TAKE YOUR FIRST STEPS TOWARD HEALING WITH ELU42™

Healing in Every Drop™

Researchers are studying a novel, topical, spray-on product, designed to help heal **diabetic foot ulcers**. Participation in this clinical trial for **diabetic foot ulcers** can help researchers advance the future of wound care.

We're evaluating a novel spray-on medication that may help **diabetic foot ulcers** heal more quickly and with less scarring. This investigational treatment supports your body's natural healing signals and is currently being studied for FDA approval.

### You may qualify if you:

- ✔ Are **18-75 years old**
- ✔ Have **Type 1 or Type 2 Diabetes**
- ✔ Have a wound that is **not infected, not ischemic, and does not involve tendon, capsule, bone, or muscle**
- ✔ Have a **diabetic foot ulcer** that's been present for **4-52 weeks**
- ✔ Have an ulcer that is **1.0 - 8.0 cm<sup>2</sup>**, located on the **foot**, and has been **off-loaded for at least 14 days**

**By joining this important Diabetic Foot Ulcer study, you can help researchers with the advancement of wound care!**

Duration:  
3-5 months  
(98-154 days)

Treatment:  
Applied 3x/week  
for up to 6 weeks

Compensation:  
\$100 for each  
completed visit
