The AtranVeloSystem is a patented, minimalistic and intuitive one motion system for secure attachment of accessories to your bike. It includes a wide range of high-quality bags, baskets, and boxes for different occasions. Accessories are modular and compatible with both front and rear carriers and they can be locked to the carrier. AVS is an open system for licensing.

AVS+ is a reinforced version of the AVS system that allows the use of accessories for heavier loads. AVS+ is compatible with childseats from various brands and with its locking function you can safely leave the seat while not in use. The system seamlessly integrates with all existing AVS accessories.

AVS SIDE is a super functional, smart and secure side system. It allows you to attach side panniers or baskets with a natural move. It will remain on safely while riding and fully utilizes modular accessories, allowing you to attach, match, mix and switch bags, baskets and crates more freely.

BAGS
