## ATRANVELO AB

Atranelo AB, based in Falkenberg, Sweden, is a leading designer and manufacturer of high-quality bicycle components. With over 80 years of experience, the company is known for its commitment to durability, functionality, and timeless design.

Our mission is to make cycling the preferred mode of transport by creating innovative, reliable, and stylish accessories that improve the biking experience, whether for commuting, leisure, or adventure.

Our key products are kickstands, luggage carriers and accessories for luggage carriers.

The AtranVeloSystem is a patented, minimalistic and intuitive one motion system for secure attachment of accessories to your bike. It includes a wide range of high-quality bags, baskets, and boxes for different occasions. Accessories are modular and compatible with both front and rear carriers and they can be locked to the carrier. AVS is an open system for licensing.

AVS+ is a reinforced version of the AVS system that allows the use of accessories for heavier loads. AVS+ is compatible with childseats from various brands and with its locking function you can safely leave the seat while not in use. The system seamlessly integrates with all existing AVS accessories.

AVS SIDE is a super functional, smart and secure side system. It allows you to attach side panniers or baskets with a natural move. It will remain on safely while riding and fully utilizes modular accessories, allowing you to attach, match, mix and switch bags, baskets and crates more freely.

# LICENSING

AVS is an open system.

The AtranVelo System (AVS) is a game-changer in modular bike accessories. Designed for quick, secure attachment and effortless interchangeability, AVS empowers riders with a smarter way to carry gear.

## **Low-Cost Licensing, High-Value Integration.**

At AtranVelo we believe that innovation should be accessible. That's why our AVS system is available to OEM partners at a low licensing cost, making it easy to integrate into your product line without compromising on quality or margin.

Benefits of licensing AVS include:

- Plug-and-play compatibility with a wide range of AVS accessories.
- Enhanced customer experience through intuitive design and secure locking.
- Brand differentiation with a proven, premium system.
- Co-branding opportunities and full support.
- Simple, streamlined licensing process.

## **AVS PREMIUM ADAPTOR: Expand Possibilities**

For the aftermarket, Atranvelo offers highly price-competitive and functional AVS adaptors that allows customers to use their existing bags, baskets, and accessories with AVS-compatible racks. This solution extends the value of AVS beyond OEM integration, giving end-users flexibility and convenience without needing to invest in new gear.

- Full range of universal interfaces for aftermarket.
- Easy installation and secure locking.
- Universal fit for a wide range of third-party accessories.
- Affordable upgrade path for consumers.

Partner with Atranvelo and bring smart, stylish, and scalable solutions. Let us be your partner in shaping the next generation of cargo and load solutions for cyclists.

# CUSTOMIZATIONS & INTEGRATIONS

Drive product differentiation with Atravelo's customisable kickstands and carriers

At Atravelo, we empower OEM partners to deliver unique, market-ready bicycle solutions through our fully customized kickstands and carriers. Whether you require a completely new design or a tailored adaptation of our proven standard models, we collaborate closely to align with your brand identity, technical requirements, and production timelines.

Our carrier systems support AVS, AVS+ and AVS SIDE configurations (setups/ta bort?/all versions), offering seamless integration across a wide range of bicycle types, from urban commuters to heavy-duty cargo bikes. This flexibility enables you to optimize both form and function, ensuring your products stand out in a competitive market.

We also offer integrated lighting solutions from leading brands such as Herrmans, Spanninga, Lite Move, and AXA, enhancing safety, compliance, and design cohesion.

Partnering with Atravelo means gaining a responsive, innovation-driven supplier, committed to helping you deliver tailored, high-quality solutions at scale.

# CARRIERS

The AtranVelo carriers are made of steel or aluminium and powder-coated in black, silver or white as standard (Akzo Nobel colors). They have a very well-thought out and classic design where we focus on making the product functional, stable, easy to mount and with a long lifetime. We offer a broad range stretching from classic to innovative and modern carriers. All our carriers are tested and approved in accordance with ISO 11243. The carriers are available with either fixed or adjustable legs.

### ALPHA

Carrying capacity: 30 kg  
 System: AVS, AVS+  
 Adjustable: Yes  
 Material: Alu/ diecast  
 Fixation: Adjustable  
 extenders/ fender fix
