

EPG ISN | Platform Update V1.9

Release Date: September 24, 2026

1. Overview

Eastern Point Global is pleased to announce additional enhancements to the ISN platform focused on expanding digital asset payment capabilities, improving account onboarding workflows, and streamlining multi-currency transaction processing.

These enhancements provide greater flexibility when managing digital asset transfers, simplify external account setup, and improve automation within the payment ecosystem.

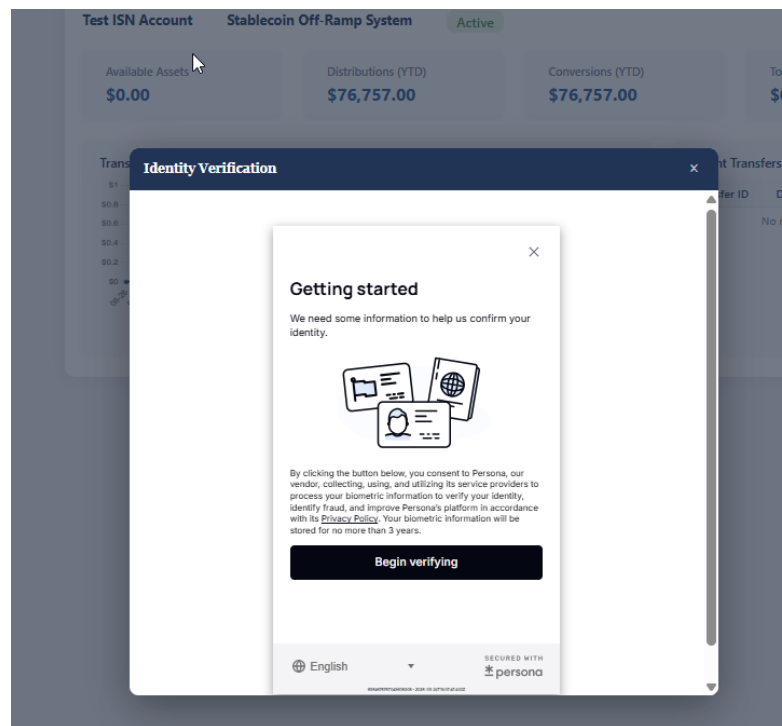

2. Key Enhancements

a) Persona Identity Verification Integration

Identity verification support has been enhanced through Persona integration, providing additional verification capabilities within supported onboarding and transaction workflows.

Enhancements Include:

- Support for Persona identity verification **when required**
- Streamlined verification experience within the platform
- Improved validation workflow for supported customer scenarios

Services are available only in jurisdictions where EPTC is authorized to operate. All information herein is for informational purposes only and does not constitute legal, fiduciary, investment, or financial advice.

For additional details, please visit our [Terms and Conditions](#).

b) Automated Currency Conversion (Auto-Swap)

The platform now supports automated currency conversion functionality through backend integration.

Enhancements Include:

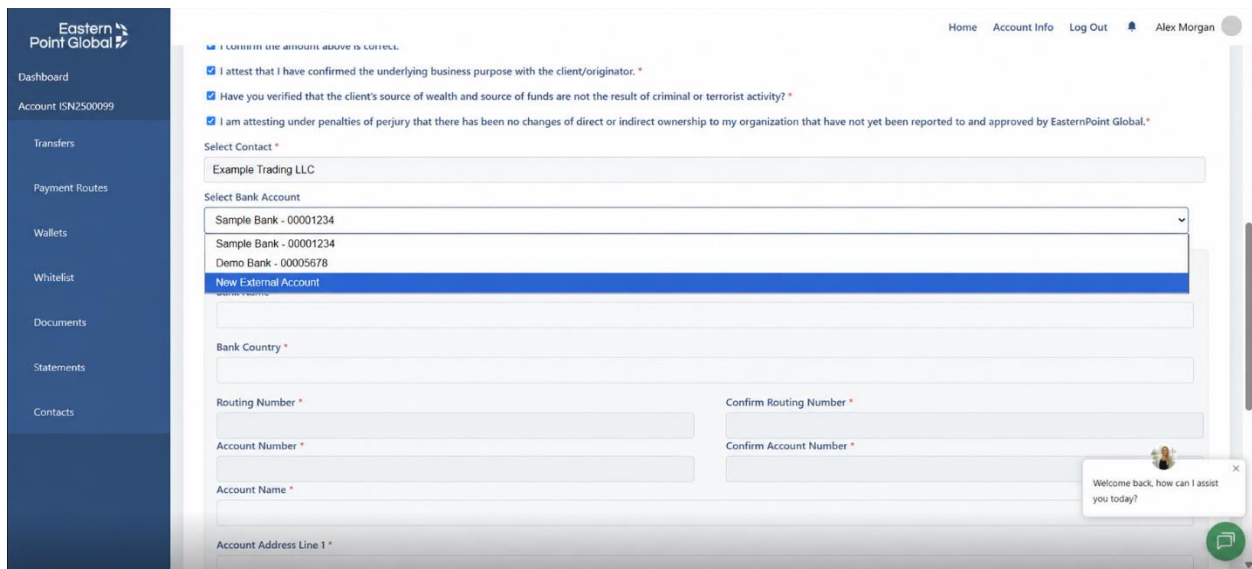

- Automatic currency conversion when supported by available payment rails
- Reduced manual intervention during transfer processing
- Intelligent routing based on supported currency pair availability

c) New External Account Creation During Transfers

Users can now create and register new external bank accounts directly within the transfer workflow.

Enhancements Include:

- Create a new external account without leaving the transfer process
- Automatic account creation and synchronization with Virtual Account & Contact records
- Simplified setup for new beneficiary accounts

The screenshot displays the Eastern Point Global web application interface. On the left is a dark blue sidebar with navigation links: Dashboard, Account ISN2500099, Transfers (highlighted), Payment Routes, Wallets, Whitelist, Documents, Statements, and Contacts. The main content area is white and shows a transfer confirmation screen. At the top, it says 'I confirm the amount above is correct.' followed by three checked checkboxes for attestation. Below this, there are dropdown menus for 'Select Contact' (showing 'Example Trading LLC') and 'Select Bank Account' (showing 'Sample Bank - 00001234', 'Sample Bank - 00001234', 'Demo Bank - 00005678', and 'New External Account' which is highlighted in blue). Below the dropdowns are input fields for 'Bank Country', 'Routing Number', 'Account Number', 'Account Name', and 'Account Address Line 1'. To the right of these fields are 'Confirm' buttons for 'Routing Number', 'Account Number', and 'Account Number'. A small chatbot window in the bottom right corner says 'Welcome back, how can I assist you today?'. The top right of the page shows links for 'Home', 'Account Info', 'Log Out', and the user's name 'Alex Morgan'.

Services are available only in jurisdictions where EPTC is authorized to operate. All information herein is for informational purposes only and does not constitute legal, fiduciary, investment, or financial advice.

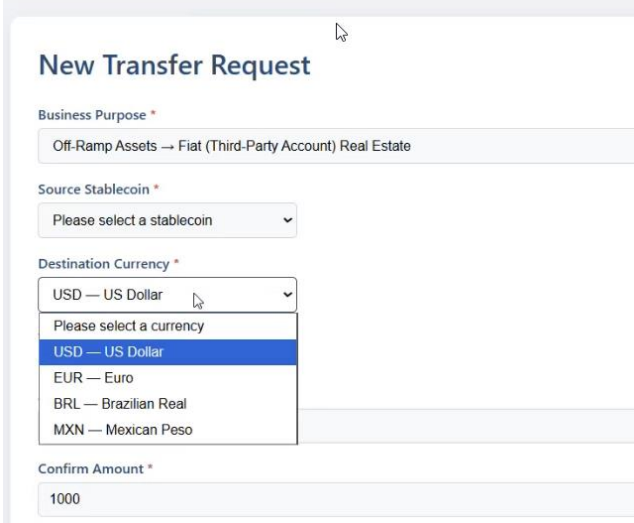

For additional details, please visit our [Terms and Conditions](#).

d) Enhanced Multi-Currency Payment Routes and Transfers

Payment Routes and Transfers now support additional fiat and asset settlement scenarios, based on each customer's approved profile and enabled payment rails. Available currencies and transfer options are displayed dynamically, with restrictions applied according to the supported payment rail.

Enhancements Include:

- Dynamic currency availability based on approved endorsements
- Currency restrictions enforced according to supported payment rails
- Improved alignment between available currencies and payment methods

The screenshot shows a web form titled "New Transfer Request". It contains several fields: "Business Purpose" with a dropdown menu showing "Off-Ramp Assets → Fiat (Third-Party Account) Real Estate"; "Source Stablecoin" with a dropdown menu showing "Please select a stablecoin"; "Destination Currency" with a dropdown menu showing "USD — US Dollar" selected, and a list of other options: "EUR — Euro", "BRL — Brazilian Real", and "MXN — Mexican Peso"; and "Confirm Amount" with a text input field showing "1000".

e) QR-Based Payment Experience Enhancements

The platform introduces additional QR-code functionality for supported payment methods and digital asset transfers.

Enhancements Include:

- QR code display for supported crypto-to-crypto payment routes
- PIX & SPEI QR code support for eligible transactions
- Improved payment initiation experience for supported rails
