### Company dashboard

Navigate your VR training progress with ease using Next World company dashboard, designed for streamlined oversight and management of your team's learning journey.

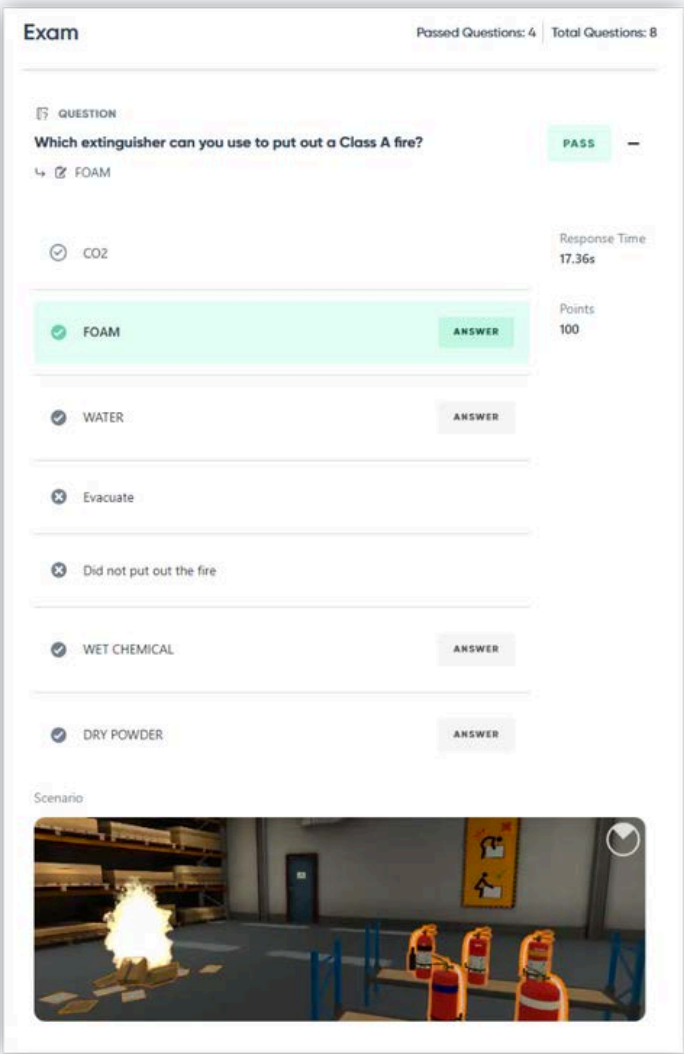

### Access VR experience course information

Discover the depths of VR training courses with Next World, offering detailed course information.

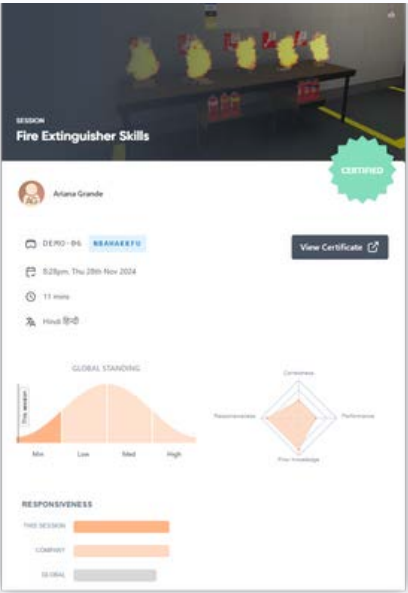

### Expose knowledge gaps in critical safety areas

Pinpoint and address the vital safety knowledge gaps within your team.

### Measure safety behaviours

Enhance workplace safety through measurable behaviours with tangible insights into team performance.

### VR trainee certificates

Recognize and celebrate your team's achievements with Next World's VR trainee certificates; a testament to their commitment and skill development.

# Custom Built VR Modules

Transform your existing training into immersive VR simulations – built for your workflows, measurable, and ready to scale.

## Vision Phase

Help us understand your project vision.  
Provide us with your training documentation.  
We provide you a proposal.

## Design Phase

We collaborate with your subject matter experts to ensure content accuracy and storyboard the user journey in VR.

## Development Phase

World-class VR developers create your custom environments, analytics, languages, and more.

## Quality Assurance Phase

We provide a you test version.  
You provide us feedback.  
We work to make it perfect.

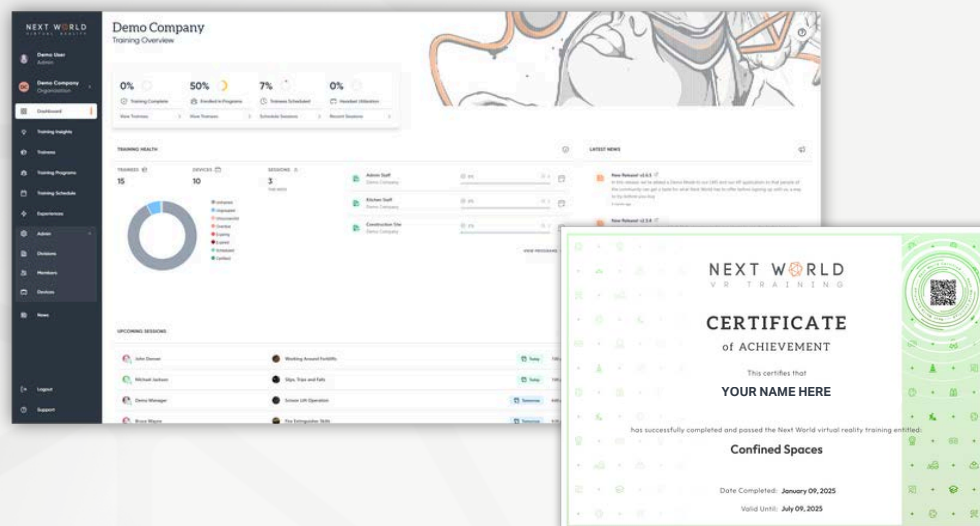

## Deployment Phase

We deploy your custom VR module to your VR headsets, ready to use.  
Start training!

## Enterprise-grade Custom VR

Integrating your custom built module into the Next World VR Ecosystem gives you access to important areas of value:

**VR Analytics Integration** – measure performance, completion rates, and safety improvement.

**VR Library Integration** – custom VR module appears within the VR library view (exclusive to you).

**Tech Support** – included as part of your subscription and can also extend to your custom module.

**VR Training Certificates** – included for your custom module and branded with your company logo.

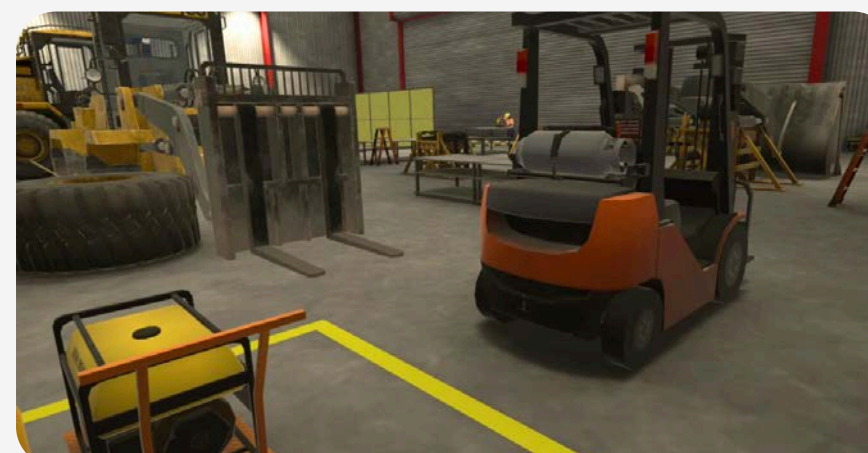

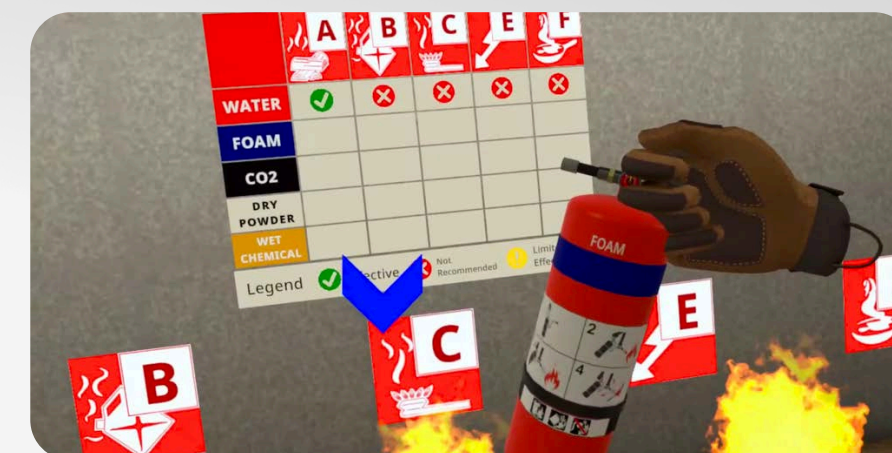

**Language Packs** – we can convert your custom VR module into any language.

**Globally Scalable** – we have local support in 19 countries with language packs and is enterprise ready.
