Certificate

# Equity & Anti-Racism in Global Healthcare

This module is part of our Healthcare Module Series

**A psychologically safe space where healthcare professionals can explore their own implicit biases and motivations.**

In collaboration with American Academy of Pediatrics.

**VR, PC, mobile and web**

**Completion certificate**

**LLM & scripted roleplays**

**Lesson planning resources**

**AI-powered personalised feedback**

**25+ Module library**

## Who is it for?

This comprehensive module is designed for a diverse range of learners and a broad range of competency levels. It's particularly beneficial for:

- **Medical Schools and Health & Social Care programmes:** Supports the development of foundational interpersonal and communication skills. This module was built with subject matter expertise from the NHS.
- **Medical Schools and Health & Social Care programmes:** Supports the development of key staff-patient communication skills in a variety of situations.
- **Healthcare institutions:** Equips practitioners and students with vital interpersonal communication skills to enhance staff-patient interactions.
- **Nursing Programmes:** This module's learning objectives are aligned with The Essentials: Core Competencies for Professional Nursing Education ("The Essentials") a publication owned by the American Association of Colleges of Nursing, which may be accessed [here](#).

# Module Structure

What's included in VR Equity & Anti-Racism in Global Healthcare

**The complete journey takes the learner through 4 interactive topics, led by virtual coach Nola, as well as ancillary activities such as onboarding, self-reflection, and the exit survey.**

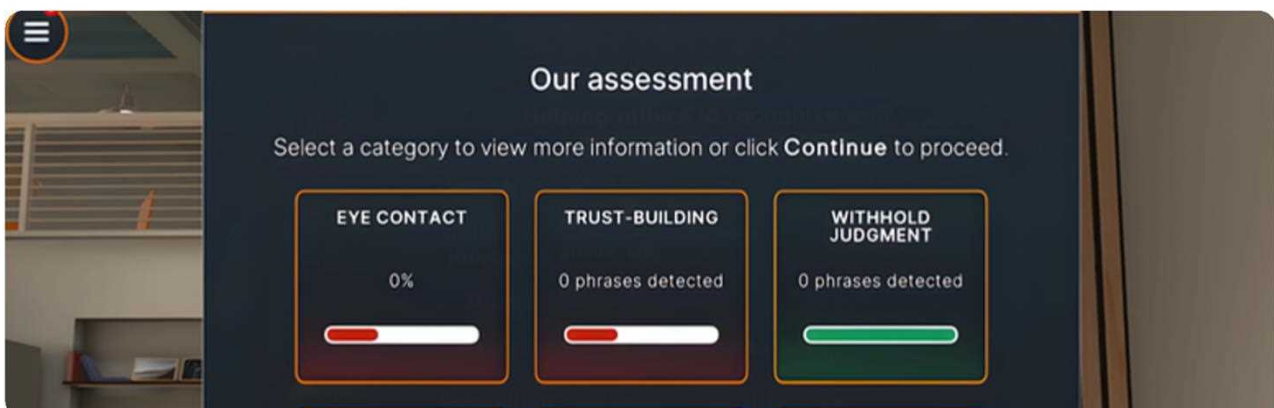

It is a linear experience, meaning the learner will be guided step by step through all the activities by Nola. We recommend that learners fully interact with each activity to get the full benefit.

It is estimated that each topic will take the learner approximately 5-10 minutes to complete, although completion times vary depending on whether the learner chooses to repeat topics to explore different options (encouraged) or to fine-tune their freeform responses.

## Learning goals

When visiting a Low or Middle Income Country (LMIC), implicit bias can have a lasting negative impact on patients, doctors and institutions. This module will help you to:

- Identify personal implicit bias
- Recognise the impact of bias on patient outcomes
- Practise strategies to mitigate personal bias
- Navigate difficult but important conversations about bias

# VR Trainee Certificate

Employees will receive a VR Trainee Certificate upon successfully completing a training module.

**Certificate of Completion:**  
Finished the module, underperformed the pass threshold
