Module Structure

What's included in VR Mental Healthcare Practitioner

This journey of learning and compassion begins with self-reflection, takes the learners through 2 topics and ends with an exit survey.

It is a linear experience, meaning the learner will be guided step by step through all the activities.

Learning goals

Through this scenario, you will find out how to:

- Develop appropriate and confident mental health patient care behaviour
- Practise individualized therapeutic interaction techniques in communicating with diverse patients
- Develop understanding of mental health and mental illness concepts in delivery of therapeutic techniques with different types of clients and environments
- Practise and develop soft skills, especially interpersonal communication skills
- Build self-confidence
- Build empathy skills
- Practise adapting to a particular patient's situation
- Develop self-awareness
