2. Inspect the work area for hazards.
3. Prepare to give first aid to the employee.
4. Ask the worker to stop his activity. To do this, point the controller at him and press the trigger, then select "Stop work" in the menu.
5. Go to the first aid kit. To move, point at the green circle and press the trigger.
6. Open the locker by placing your hand in the highlighted area on the door and pressing the trigger.
7. Take the first aid kit by placing your hand on the object and pressing the trigger.
8. Approach the victim.
9. Eliminate hazards near the victim by pointing the controller at them and pressing the trigger.
10. Place the first aid kit near the victim by bringing it to the highlighted area and pressing the trigger.
11. Check the victim's condition by pointing the controller at him and pressing the trigger, then ask if he needs help.
12. Try to revive the victim by pressing the controller into the highlighted area.
13. Remove the victim's hardhat by placing your hand in the highlighted area and pressing the trigger.
14. Place your left hand on his forehead by positioning your hand in the highlighted area and pressing the trigger.

15. Place your right hand on his chin by positioning your hand in the highlighted area and holding the trigger.

16. Check the victim's breathing by bringing your ear close to his mouth.

17. Ask your colleague to call an ambulance by pointing the controller and pressing the trigger, then selecting "Call an ambulance" in the menu.

18. Undo the victim's robe by moving your hand to the highlighted area and pressing the trigger.

19. Open the first aid kit by moving your hand to the highlighted area and pressing the trigger.

20. Put on a mask by placing your hand in the highlighted area and pressing the trigger.

21. Put on the gloves by placing your hand in the highlighted area and pressing the trigger.

22. Move to the CPR area by pointing at the green circle and waiting for it to fill in.

23. Place your hands on the victim's chest by positioning them one over the other in the highlighted area.

24. Perform thirty chest compressions by lowering and raising your hands a few centimeters relative to the chest.

25. Place your hands on the victim's head by positioning them one at a time in the highlighted area.

26. Give the victim two breaths by placing your lips over his mouth for one second until you hear the exhalation sound and see a visual cue, then lift your head, wait three seconds, and repeat.
27. Place your hands on the victim's chest by positioning them one over the other in the highlighted area.
28. Perform thirty chest compressions.
29. Place your hands on the victim's head in the highlighted area.
30. Give the victim two breaths following the same procedure.
31. Place your hands on the victim's chest in the highlighted area.
32. Perform thirty chest compressions.
33. Place your hands on the victim's head in the highlighted area.
34. Give the victim two breaths following the same procedure.
35. Take the scissors by placing your hand in the highlighted area and pressing the trigger.
36. Cut the victim's trouser leg by moving your hand with the scissors to the highlighted area and pressing the trigger.
37. Return the scissors to the first aid kit by bringing them to the highlighted area and pressing the trigger.

38. Take the bandage by placing your hand in the highlighted area and pressing the trigger.

39. Bandage the wound by moving your hand with the bandage to the highlighted area and pressing the trigger.

40. Take the tourniquet by placing your hand in the highlighted area and pressing the trigger.

41. Apply the tourniquet by moving your hand with it to the highlighted area and pressing the trigger.

42. Sign the tourniquet by placing your hand in the highlighted area and pressing the trigger.

43. Take the blanket by placing your hand in the highlighted area and pressing the trigger.

44. Cover the victim by moving your hand with the blanket to the highlighted area and pressing the trigger.

45. The task is completed.

46. To exit the task, press the Menu button.

VR Trainee Certificate

Employees will receive a VR Trainee Certificate upon successfully completing a training module.

Certificate of Completion:
Finished the module, underperformed the pass threshold
