# Truck Preparation for Driving

## VR Module Overview

VR module created by 

Learning

Training

Certificate

# Experience Overview

What's included in VR Truck Preparation for Driving

**The assessment starts in the room where you get your documents. Then you will get your work permit to start preparing for driving.**

You will approach your vehicle and check for multiple possible problems, including oil and coolant levels, wheels, signs, driver's PPEs, all types of lights, leakages, fifth-wheel coupling, engine, vehicle systems and many other points in your checklist.

You will have to go through all points in your checklist to complete the task. In the training and the exam possible problems will be randomized to make each experience unique.

# Module Walkthrough

In the Learning Mode you'll be guided through the following steps. In the Training and Exam modes you'll be on your own completing the task. To exit the task press the Menu button.

1. Welcome to the Truck preparation for driving VR training. Select the mode. To do this, point the controller at the mode and pull the trigger.

2. Prepare the truck for driving.
3. Come to the table. To move, point the controller to the green circle and pull the trigger.
4. Take your driver's license out of your breast pocket. To pick up an item, move your hand to it and pull the controller trigger.
5. Show your driver's license to the dispatcher. To do this, bring and hold the ID in the highlighted area in front of the dispatcher until the end of the check.
6. Put your ID back in your pocket. To do this, hold your ID in the highlighted area of your pocket. Then pull the trigger on the controller.
7. Take a tablet with the checklist from the table and the waybill.
8. Read the documents. To do this, inspect them until the check mark appears on each side of the tablet.
9. Go to the garage. To open the door, move your hand to the highlighted area of the door handle and pull the controller trigger.
10. Give the waybill to the mechanic. To do this, bring the tablet to the highlighted area of the mechanic's hand. Then pull the trigger on the controller.
11. Take the car key from the mechanic. Then go to the cabin.
12. Prepare the truck for driving using a checklist on the wall. Mark items in the checklist in accordance with the results of the check.

13. Open the door lock. To do this, bring the key to the highlighted area of the door handle. Then pull the trigger on the controller.

14. Enter the cab. To do this, move your hand to the door handle. Then pull the trigger on the controller.

15. Connect the battery with a disconnect switch. To do this, move your hand to the highlighted switch button. Then pull the trigger on the controller.

16. Check that the gear is in neutral. To do this, move your hand to the gear lever. Then pull the trigger on the controller.

17. Insert the key into the ignition lock. To do this, bring the key to the highlighted area of the ignition lock. Then pull the trigger on the controller.

18. Turn the key and start the vehicle. To do this, move your hand to the highlighted button. Then pull the trigger on the controller.

19. Check the odometer. To do this, point the controller pointer at the odometer. Then pull the trigger on the controller.

20. Put a check mark in the checklist for passing the inspection point. To do this, without leaving the cab, point the controller pointer at the odometer item in the checklist on the wall. Then pull the trigger on the controller. Then point at answer option in the menu and pull the trigger.

21. Check the operation of the steering wheel and wheels. To do this, move your hand to the steering wheel and hold the controller trigger.

22. Without releasing the controller trigger, turn the steering wheel 180 degrees to the left or right. Then release the controller trigger.

23. Get out of the truck. To open the door, move your hand to the highlighted area of the door handle and pull the controller trigger.

24. Check the alignment of the positions of the wheels and the steering wheel. Put a check mark in the checklist. To do this, move the controller pointer to the wheel behavior item in the checklist on the wall. Then pull the trigger on the controller. Then point at an answer option in the menu and pull the trigger.

25. Check brake lamps. To do this, while in the car, point the controller pointer at the brake pedal. Then pull the trigger on the controller. Then check the brake lamps performance through the side mirrors or the pop-up image. After checking, put a mark on the inspection point in the checklist.

26. Check the condition of the windshield. To do this, point the controller pointer at the windshield. Then pull the trigger on the controller. After checking, put a mark on the inspection point in the checklist.

27. Check the condition of the right side mirrors. To do this, point your controller and pull the trigger. After checking, put a mark on the inspection point in the checklist.

28. Check the condition of the left side mirrors. To do this, point your controller and pull the trigger. After checking, put a mark on the inspection point in the checklist.

29. Check the operation of the windshield wipers. To do this, move your hand to the highlighted area of the wiper handle and pull the controller trigger to move the handle down. After checking, put a mark in the checklist.

30. Check the operation of the windshield water supply system. To do this, move your hand again to the highlighted area of the wiper handle and pull the controller trigger to pull it towards you. After checking, put a mark in the checklist.

31. Check the operation of the headlights. To do this, move your hand to the highlighted area of the light button. Then pull the controller trigger. If necessary, exit the cab and inspect the equipment being tested. After checking, put a mark in the checklist.

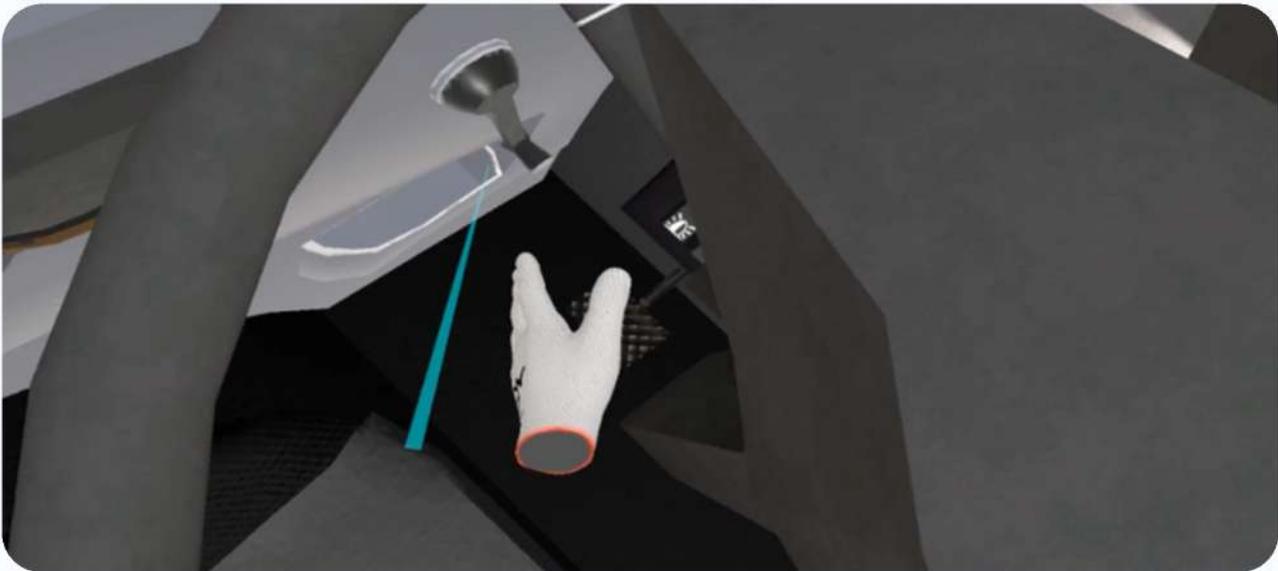

32. Check the operation of the daytime running lights. To do this, move your hand again to the highlighted area of the light button. Then pull the trigger on the controller. After checking, put a mark in the checklist.

33. Check the operation of the emergency lights. To do this, move your hand to the highlighted area of the corresponding button. Then pull the trigger on the controller. After checking, put a mark in the checklist.

34. Check the operation of the sound signal. To do this, move your hand to the highlighted area of the handle. Then pull the trigger on the controller. After checking, put a mark in the checklist.

35. Check the operation of the interior heating. To do this, move your hand to the highlighted heating button. Then pull the trigger on the controller. The interior temperature status will be displayed in the pop-up window. After checking, put a mark in the checklist.

36. Check the functionality of the tachograph. To do this, point the controller at the tachograph. Then pull the trigger on the controller. After checking, put a mark in the checklist.

37. Check the contents of the mandatory driver's kit, consisting of a fire extinguisher, warning triangle, first aid kit and a portable lamp. To do this, point the controller pointer over the appropriate item. Then pull the trigger on the controller.

38. A first aid kit and a portable flashlight are located in a box between the seats. Open it. To do this, move your hand to the highlighted area of the door. Then pull the trigger on the controller.

39. Check the availability of a first aid kit and a portable flashlight.

40. Close the box. To do this, move your hand to the highlighted area of the door. Then pull the trigger on the controller.

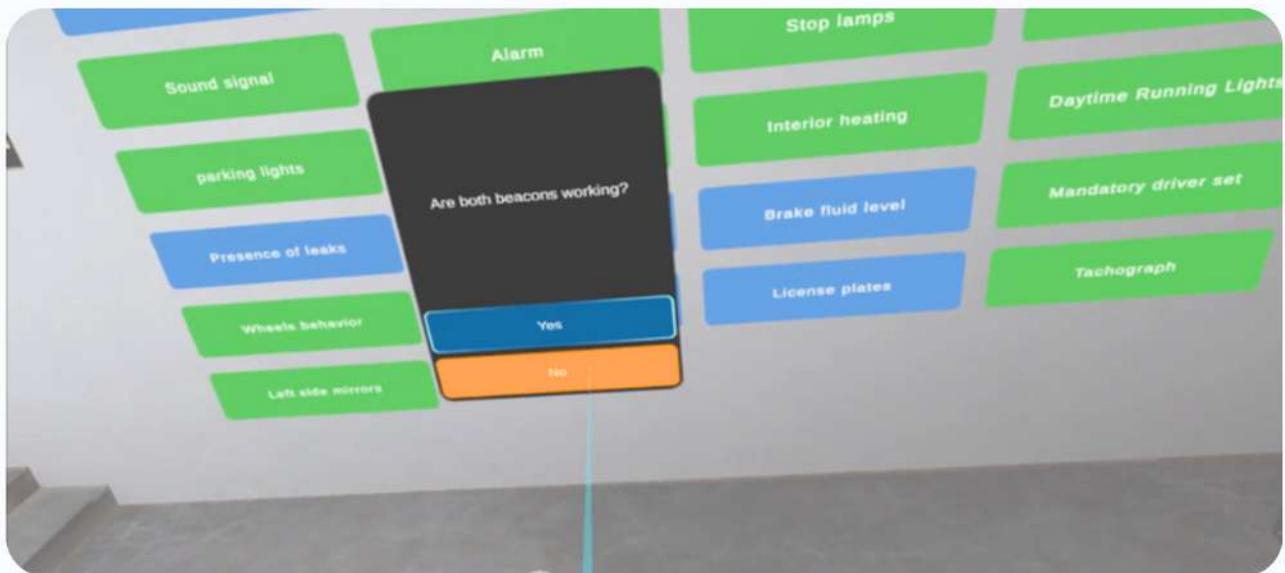

41. Put a check mark in the checklist for passing the inspection point.

42. Check the presence of driver protective equipment. To do this, point the controller to the protective equipment kit. Then pull the trigger on the controller. After checking, put a mark in the checklist.

43. Check the operation of the flashing beacons. To do this, move your hand to the highlighted area of the button for turning on the flashing beacons. Then pull the trigger on the controller. After checking, put a mark in the checklist.

44. Check the condition of the seat belt. To do this, move your hand to the highlighted area of the seat belt buckle. Then pull the trigger on the controller.

45. Insert the seat belt into the buckle. To do this, move the metal tongue to the highlighted area of the buckle. Then pull the trigger on the controller.

46. Unfasten the seat belt. To do this, move your hand into the highlighted area of the buckle. Then pull the trigger on the controller.

47. Put a mark on the inspection point in the checklist.

48. Switch off the ignition. To do this, move your hand to the key in the ignition lock. Then pull the trigger on the controller. Then pull the trigger again to collect the key.

49. Hang the key near the breast pocket. To do this, bring the key to the highlighted area near the breast pocket. Then pull the trigger on the controller.

50. Check the condition of the license plates on the front and rear of the vehicle, as well as on the rear of the semi-trailer. To do this, point the controller at the license plate and pull the trigger, then repeat the operation with the rest of the license plates. After checking, put a mark in the checklist.

51. Check the condition of the tires and the nuts on all wheels, including the spare. To do this, point your controller pointer over an item. Then pull the trigger on the controller. Then repeat the steps with each wheel of the car and semi-trailer. After checking, put a mark in the checklist.

52. Check the areas under the engine and under the fuel tank for oil, fuel, and water leaks. To do this, move the controller pointer over the highlighted area under the engine. Then pull the trigger on the controller. Then repeat the steps to inspect the area under the gas tank. After checking, put a mark in the checklist.

53. Check for wheel chocks attached to the rear of the machine. To do this, move the controller pointer over the chocks. Then pull the trigger on the controller. Then repeat the steps to inspect all wheel chocks.

54. Put a check mark in the checklist for passing the inspection point.

55. Check the car's suspension. To do this, point the controller pointer at the highlighted area near the hitch. Then pull the trigger on the controller. After checking, put a mark in the checklist.

56. Approach the fifth wheel coupling.

57. Check the condition of the fifth wheel coupling. To do this, move your hand to the lock control lever and hold the controller trigger until the lever is fully extended.

58. Return the lever to its original position. To do this, release the trigger on the controller.

59. Put a mark on the inspection point in the checklist.

60. Go to the area behind the cab and check the oil level. To do this, put your hand in the highlighted area of the dipstick. Then pull the trigger on the controller. After checking, put a mark in the checklist.

61. Check the coolant level. To do this, point the controller pointer at the coolant reservoir. Then pull the trigger on the controller. After checking, put a mark in the checklist.

62. Approach the car from the front and stand near the hood.

63. Open the hood. To do this, move your hand to the highlighted area. Then pull the trigger.

64. Check the brake fluid level. To do this, point the controller pointer at the brake fluid reservoir. Then pull the trigger. After checking, put a mark in the checklist.

65. Close the hood. To do this, move your hand to the highlighted area. Then pull the trigger.

66. Go to the area behind the cab and check the remaining technical fluids. To do this, point the controller's pointer over the test button. Then pull the trigger on the controller.

67. Go to the area behind the cab.

68. Check the remaining technical fluids. To do this, point the controller's pointer over the test button. Then pull the trigger on the controller.

69. Inspect the semi-trailer vehicle and check for the presence of two signs of information hazard systems and six safety signs. To do this, point the controller pointer at the sign. Then pull the trigger on the controller.

70. Put a mark in the checklist.

71. Check that all items in the checklist have been completed. To do this, make sure that all items are marked as completed, point the controller pointer over the Finish inspection button. Then pull the trigger on the controller.

72. Congratulations! You have successfully completed Truck preparation for driving VR training.

# VR Trainee Certificate

Employees will receive a VR Trainee Certificate upon successfully completing a training module.

**Certificate of Completion:**  
Finished the module, underperformed the pass threshold
