NEW SERVICE · HPE VM ESSENTIALS

HPE VM Essentials Installation Service

Proven expertise. Predictable pricing.
Get ready to migrate sooner.

A migration can stall before the first workload moves. RiverMeadow installs and configures HPE VM Essentials, then validates the installation and configuration through build validation checks, with documented results and any actions required before handover.

Know your installation cost
A fixed price for the defined scope gives you budget clarity before work starts.

Confidence in the build
Identify installation and configuration issues before workload onboarding, with documented validation results.

Clear delivery accountability
A delivery plan, defined responsibilities and a documented handover, start to finish.

Free your engineering team
Our engineers build the platform while yours focus on the wider transition.

ONE DEFINED INSTALLATION ENGAGEMENT

01 Prepare
Readiness review and implementation plan

02 Build
Install and configure hosts, clusters and networks

03 Validate
Complete RiverMeadow build validation checks and provide documented results

04 Hand over
As-built records, Build Validation Report and administrator handover

WHAT YOU PROVIDE
Approved architecture, ready infrastructure, licenses and access.

WHAT WE DELIVER
Fixed-price installation, RiverMeadow build validation and a Build Validation Report.

WHY RIVERMEADOW

- HPE VM Essentials is a supported migration destination on the RiverMeadow Workload Mobility Platform
- Enterprise migration experience informs every platform build
- SOC 2 Type II compliant

WHEN YOU'RE READY FOR WHAT'S NEXT

Installation (This service) › **Migration** (Optional) › **Enablement** (Optional)

Move workloads onto your new platform with RiverMeadow, under separately scoped engagements.

Plan your deployment with RiverMeadow

Share your target sites, clusters and hosts for an initial estimate.
