

EBOL EM-S

TECHNICAL DATA SHEET TL 097/2001

Date of issue: 17.6.2002

Date of revision: 3.7.2025

Product characteristics

EBOL EM-S is a balanced blend of anionic and non-ionic surfactants.

Use:

EBOL EM-S is used as a special emulsifier for mineral and vegetable oils, emulsifier in the production of insecticides.

Product features

EBOL EM-S is at room temperature a yellow-brown liquid.

EBOL EM-S must comply with these features:

<i>Quality sign</i>	<i>Value</i>
pH of 10% aqueous solution	5-7
Water content in %	max. 6

Product processing

This product is generally applied to the selected formulations in amounts of 2 to 5 % to the product, depending on the concentration of the final application emulsions.

Packaging, storage

EBOL EM-S is supplied in PE cans of capacity 50 litres or in other pre-arranged packaging. It is stored in sealed packages, protected from direct weathering. Recommended storage temperature is +5 to +25°C, hidden from direct sunlight or near heat sources. Short-term exposure to low temperatures does not adversely affect the application properties of the product.

Transport

EBOL EM-S is transported by covered means of transport in accordance with ADR/RID regulations.

Warranty period

If the product is transported and stored according to the above conditions, its warranty period is 12 months from the date of removal.

Note

Data on the properties of the product and its processing were obtained by laboratory measurements and application tests. This data sheet can only provide legally non-binding advice, the product processing must be adapted to the specific conditions.
