

EBOL MEG

TECHNICAL DATA SHEET

TL 435/2007

Date of issue: 29.5.2006

Date of revision: 23.6.2025

Chemical characteristics of the product

Ethan-1,2-diol (ethylenglykol).

Product features

EBOL MEG is colorless to light yellow liquid

Quality sign	Value
Density at 20 °C in kg.m ⁻³	1115 - 1116
Water content in %	max. 0,5

Use:

EBOL MEG is used as an antifreeze in cooling or heat transfer systems. When diluting with water, we recommend using demineralized water. Sulphate and chloride ions are particularly undesirable.

Packaging, storage

The ALMIT HW-20 is supplied in PE cans with a capacity of 200 liters or in other pre-agreed packaging. It is stored in sealed containers in places protected from direct weather conditions. The recommended storage temperature is -10 to +25 °C.

Transport

It is transported by covered vehicles in accordance with ADR/RID regulations.

Warranty period

If the product is transported and stored according to the above conditions, its warranty period is 24 months from the date of removal.

Note

Data on the properties of the product and its processing were obtained by laboratory measurements and application tests. However, this data sheet can only provide legally non-binding advice, the product processing must be adapted to the specific conditions.
