

CH-SEBON KPZ1

TECHNICAL DATA SHEET TL 720/2015

Date of issue: 15.4.2015

Date of revision: 3.7.2025

Product characteristics

An aqueous solution of a mixture of potassium salts of fatty acids derived from natural oils and oleic acid, with the addition of emulsifiers and a stabilizer.

Use:

CH-SEBON KPZ1 is used as an emulsifier and as a raw material for the production of cosmetic and cleaning products.

Product features

CH-SEBON KPZ1 is a yellow to yellow-brown liquid of medium viscosity, infinitely miscible with water.

Quality sign	Value
Dry matter content in %	min. 28
pH of 3% aqueous solution	9-10

Product processing

This product has applications in formulations for the production of cosmetic and cleaning products.

Packaging, storage

CH-SEBON KPZ1 is supplied in IBC packaging of capacity 1000 litres, in PE cans of 50 litres or in other pre-arranged packaging. It is stored in sealed packages, protected from direct weathering. Recommended storage temperature is +5 to +25°C, hidden from direct sunlight or near heat sources. Protect from frost!

Transport

CH-SEBON KPZ1 is transported by covered means of transport, not subject to ADR/RID regulations.

Warranty period

If the product is transported and stored according to the above conditions, its warranty period is 12 months from the date of removal.

Note

Data on the properties of the product and its processing were obtained by laboratory measurements and application tests. This data sheet can only provide legally non-binding advice, the product processing must be adapted to the specific conditions.
