

Volt Funded - Website - FAQs

Prop Trading

What is prop trading?

Prop trading (short for proprietary trading) is when you trade with funds provided by a company. At Volt Funded, you bring the strategy, and we provide the tools, platform, and risk limits. We back your trading skills with our own capital and once you pass an evaluation Challenge, we could offer you a Funded account where you get to keep 90% of the profits!

How is prop trading different from retail trading?

Retail trading involves using your own funds on your own brokerage account, meaning your potential returns are limited by your own personal capital.

Prop trading removes this limitation. With a prop trading firm like Volt Funded:

- You trade with the firm's capital instead of your own.
- You follow the firm's trading rules.
- If you are awarded a Funded account (after successfully completing an evaluation Challenge), you will earn a share of the profits.

The prop trading model is designed to give skilled and talented traders access to significant resources and capital, that they may not necessarily have in their personal capacity.

Do prop traders have to have a contract?

To open a Volt Funded account, you need to accept the general [Terms and Conditions](#).

This allows you to complete evaluation Challenges.

If we offer you a Funded account, we ask you to sign a Trader Agreement to keep everything fair and clear. It sets out your risk limits, payout schedule, platform access, and house rules so there are no surprises, only clarity.

How old do I have to be to trade with Volt Funded?

You need to be over 18 years old to use Volt Funded and become a prop trader.

Can I earn a living from prop trading?

It's possible to earn a living through prop trading if you build consistency. While results will always vary and no income is guaranteed, many traders use Funded accounts to create a meaningful, growing stream of payouts. Our role is to equip you with the tools,

platform, support, and capital to pursue that goal. Your earning potential grows with your strategy, your discipline, and your success.

Is there a limit on how much you can earn?

With a Funded account from Volt Funded, there is no set limit on earnings. Earning potential is limited only by the prop trader's strategy and success. Smart traders focus on risk management and steady growth to protect the account and maintain company funding.

What is a Challenge in prop trading?

A Challenge is an evaluation where we can assess your trading consistency and risk control. You will need to be successful trading within a clear set of rules to prove your discipline and ability.

On Volt Funded, you can choose between the **1V (One-phase) Challenge** and the **2V (Two-phase) Challenge**.

During a Challenge, your goal is to pass the set number of phases by reaching profit targets while following the prescribed trading rules. These include, for example a minimum number of trading days, maximum daily and overall drawdowns, and restrictions on news trading.

If you break any of the rules, your account may be suspended or closed, and you could fail the Challenge. If you pass the Challenge, we will review your account and may offer you a Funded account.

What is a Funded account?

A Funded account is an account given to you and funded with our own capital. Similar to the evaluation Challenges, there are certain trading rules you need to abide by with a Funded account and breaking these may result in a cancellation of your account.

With a Funded account, there is no set profit target. You keep 90% of any profits you generate, while Volt Funded receives the remaining 10%.

You may be offered a Funded account once you have passed an evaluation Challenge and we have reviewed your account. To accept the Funded account, you would need to sign a trader agreement with Volt Funded. You will also need to complete ID verification to withdraw any funds.

Am I trading with real funds?

No, you trade with virtual funds in a simulated market environment, mimicking real market pricing. If you have a Funded account, you are paid from Volt Funded capital that can be withdrawn from your account.

Is trading live?

No, you trade in a simulated market environment that mimics real market pricing and conditions.

What are the benefits of prop trading?

Prop trading can be a great opportunity for some traders and have a number of advantages.

- Access to capital: Trade a larger balance without having to use your own funds.
- High profit share: At Volt Funded, keep 90% of profits on Funded accounts.
- Clear structure: Defined drawdowns, leverage, and minimum trading days create discipline and guardrails that can sharpen your trading skills.
- Professional tools and environment: Platform access, mimicking live market pricing, and risk tracking in one place.
- No time pressure (with Volt Funded): Our evaluation Challenges have no time limit, so you can trade at your own pace.
- Easy payouts: Regular withdrawal windows, including crypto options where available.

What are the risks of prop trading?

Compared to retail trading, prop trading reduces your financial risk as you are not trading your personal capital. However, all trading has risk, and these are the key prop trading risks to consider:

- Rule breaches: If you hit the daily or overall drawdown, trade during a restricted news window, or break a trading rule, your account may be suspended or closed.
- Strategy restrictions: Certain strategies are prohibited and can result in your account being suspended or closed.
- Execution and technology risk: Slippage, spreads, internet issues or platform downtime can affect results.
- Leverage: It amplifies wins, but losses too. Poor position sizing may lead to accelerated losses.
- Market risk: Markets can be unpredictable. Poor risk management can quickly lead to a breach of trading rules and put your account at risk.

- No guarantee of income: Even skilled traders have drawdowns. Only a small percentage are consistently profitable.

The key is discipline. With proper risk management, prop trading may be considered less risky than trading with your own funds.

Who is prop trading most suitable for?

Prop trading is a great fit for:

- New or experienced traders looking to further develop their trading knowledge in a simulated environment.
- Traders who already have a strategy but lack sufficient personal capital.
- Individuals who are disciplined and can follow risk parameters.
- Experienced retail traders ready to formalise their trading into a more structured environment.

Volt Funded

Is Volt Funded a trading broker?

No, we are not a trading broker. Volt Funded is a prop trading (proprietary trading) company. Traders do not make deposits of their own money to trade. Clients pay an activation fee to take part in an evaluation Challenge, with a view to being offered a Funded account from Volt Funded.

Do I have to be a professional trader to use Volt Funded?

No. We are looking for talented traders who may not have access to capital to ignite or advance their career. To be successful with prop trading, you need to be strategic, able to manage risk effectively, and prove to be consistent in trading within certain rules. If this sounds like you, and you have a passion for trading, then [try prop trading](#).

Do I need to have a lot of capital to start trading with Volt Funded?

Not at all. We are here to provide the capital for talented traders who demonstrate discipline and effective strategies. There is an affordable activation fee, ranging from \$30 to \$550, to participate in an evaluation Challenge, but no further capital is needed.

Can I use Volt Funded for free?

No, you need to pay the activation fee for your chosen Challenge plan, but they are affordable and range from \$30 for access to \$2,500 up to \$550 for access to \$100,000 in simulated funds.

Evaluation Challenges and Funded Accounts

What Challenge plans available?

Volt Funded offers two different evaluation Challenges, with individual plans.

1V One-Phase Challenge

Capital	Activation fee
\$2,500	\$30
\$5,000	\$55
\$10,000	\$105
\$25,000	\$210
\$50,000	\$330
\$75,000	\$420
\$100,000	\$550

2V Two-Phase Challenge

Capital	Activation fee
\$2,500	\$30
\$5,000	\$50
\$10,000	\$95
\$25,000	\$200
\$50,000	\$300
\$75,000	\$390
\$100,000	\$520

You can see the profit targets, drawdown limits and leverage available on the [Challenge Plan Table](#).

Is there a fee to join an evaluation Challenge?

Yes. Each Challenge type and plan has its own entry fee. You can view these on the [Challenge Plan Table](#).

This fee covers:

- Access to the platform
- Risk monitoring
- Account setup
- Support and verification services

What is the Volt Funded 1V One-Phase Challenge?

The Volt Funded 1V One-Phase Challenge is an evaluation, where you must pass a single phase, trading with a set of rules, before potentially being offered a Funded account. You choose your level of capital from \$2,500 to \$100,000 and pay the applicable activation fee to start the Challenge.

How it works

- **Goal:** Reach 10% profit target while staying within the Challenge rules for limits and activity, for example, a minimum of 5 trading days, a maximum daily drawdown of 3% and maximum overall drawdown of 8%.
 - **Pass:** If you meet the target without any breaches of rules, your account will be reviewed, and you may be offered a Funded account.
 - **Fail:** If you breach a rule, the phase may end, and your account may be closed.

If you are offered and accept a Funded account, you will:

- Trade under the set rules and limits.
- Keep 90% of the profits you generate.

What is the Volt Funded 2V Two-Phase Challenge?

The Volt Funded 2V Two-Phase Challenge is an evaluation, where you must pass two consecutive steps, trading with a set of rules, before potentially being offered a Funded account. You choose your level of capital from \$2,500 to \$100,000 and pay the applicable activation fee to start the Challenge.

How it works

Phase 1

- **Goal:** Reach 8% profit target while staying within the Challenge rules for limits and activity, for example, a minimum of 5 trading days, a maximum daily drawdown of 4% and maximum overall drawdown of 10%.
 - **Pass:** If you meet the target without any breaches of rules, you will move to Phase 2.
 - **Fail:** If you breach a rule, the phase may end, and your account may be closed.

Phase 2

- **Goal:** Reach 5% profit target, still respecting the trading rules and limits.
 - **Pass:** You may be offered a Funded account.
 - **Fail:** If you breach a rule, the phase may end, and your account may be closed.

If you are offered and accept a Funded account, you will:

- Trade under the set rules and limits.
- Keep 90% of the profits you generate.

Can I have multiple Challenges running at the same time?

Yes, you are allowed to enter multiple Challenges at the same time, however, the maximum capital allocation allowed for Funded accounts is \$200,000. This means that no matter how many Challenges you pass, the maximum capital you will ever have awarded in Funded accounts is \$200,000.

In a case where you pass multiple Challenges and the total capital exceeds \$200,000, the excess amount may be issued to you if a Funded account is closed and your total capital decreases. In this instance, we would issue an amount from your excess to a maximum allocation of \$200,000 across Funded accounts.

Can I change my Challenge plan or account size after I've paid the activation fee?

No, you will have to purchase a new Challenge.

How long will it take to get a Funded account once I pass the evaluation Challenge?

Funded accounts are issued within 2 business days, after results in Challenge phase are reviewed and verified.

What is a Funded account from Volt Funded?

A Funded account is an account given to you and funded with our own capital. Similar to the evaluation Challenges, there are certain trading rules you need to abide by with a Funded account and breaking these may result in a cancellation of your account.

With a Funded account, there is no set profit target. You keep 90% of any profits you generate, while Volt Funded receives the remaining 10%.

You may be offered a Funded account once you have passed an evaluation Challenge and we have reviewed your account. To accept the Funded account, you would need to sign a trader agreement with Volt Funded. You will also need to complete ID verification to withdraw any funds.

Is there a maximum capital allocation?

Yes, maximum capital allocation for a Funded account is \$200,000.

In a case where you pass multiple Challenges and the total capital exceeds \$200,000 the excess amount may be issued to you if you a Funded account is closed and your total capital decreases. In this instance, we would issue an amount from your excess to a maximum allocation of \$200,000 across Funded accounts.

Trading Rules and Risk Limits

What is the profit target?

Your profit target is determined by your choice of evaluation Challenge.

1V One-Phase Challenge:

- The profit target is 10% of starting capital.

2V Two-Phase Challenge:

- The profit target for the first phase is 8%, and 5% for the second phase.

Funded account:

- There is no set profit target.

How much time do I have to complete each phase?

There is no time limit to complete a phase. You can take as long as you need to reach your profit target, allowing you to trade at your own pace without pressure or deadlines.

Is there a time limit to reach the profit target?

No, there is no time limit. Volt Funded Challenges are designed for flexibility. You can trade without rushing or overtrading. Simply follow your strategy until you reach the profit target.

While there is no time limit to reach the profit target, please be aware that your account will be closed if you have 30 (thirty) consecutive days of no trading activity.

What are the minimum trading days?

We require a minimum of 5 trading days, where a trading day means you have opened at least one position.

Are drawdown limits static or trailing?

Maximum drawdown limits are static, meaning they are based on the starting balance of the account.

The maximum daily drawdown limit is calculated on equity, being your account balance + floating P&L (unrealised profits and loss) at the beginning of each trading day, 00:00 EET (UTC+2) / EEST (UTC+3).

The maximum overall drawdown limit is based on your starting balance (your chosen capital) of the Challenge.

What are the daily drawdown limits and how do they work?

The daily drawdown limit is the maximum amount of loss you can incur in a single trading day. This includes closed losses, floating (unrealised) losses, swap fees, and commission charges.

As long as your combined losses do not exceed the daily drawdown limit specified for the account, your account remains active. Once the limit is breached, the Challenge or Funded account is automatically closed.

Daily drawdown limits reset every day at 00:00 EET (UTC+2) / EEST (UTC+3), giving you a fresh start and ensuring discipline throughout the evaluation.

What is the maximum daily drawdown allowed?

Your maximum daily drawdown limit is dependent on whether you entered or completed a **1V One-Phase Challenge** or a **2V Two-Phase Challenge**.

- 1V One-Phase Challenge: 3% for all phases of the Challenge, including Funded.
- 2V Two-Phase Challenge: 4% for all phases of the Challenge, including Funded.

When does the daily drawdown reset?

The daily drawdown limit resets at 00:00 EET (UTC+2) / EEST (UTC+3).

At this moment, your daily drawdown limit refreshes, giving you a new trading day with a clean drawdown limit.

What is the maximum overall drawdown allowed?

The maximum overall drawdown allowed is the total amount your account is allowed to lose from the starting balance at any time for the lifetime of the account.

For 1V One-Phase Challenge:

- Overall drawdown limit: 8%
- This applies to Challenge and Funded phases

For 2V Two-Phase Challenge:

- Overall drawdown limit: 10%
- This applies to Challenge and Funded phases

An account will be considered failed if the overall equity or balance ever falls below this threshold.

How do I calculate the maximum drawdown limit in \$?

Volt Funded uses two types of drawdown limits:

- Daily drawdown – this is the maximum you can lose in a single trading day
- Overall drawdown – this is the maximum you can lose across the entire account for the lifetime of the account

Understanding both is key to managing risk and avoiding a breach, which would break the trading rules, and your account would be closed.

Calculating maximum daily drawdown (DD) in dollars

Your maximum daily DD (\$) is calculated based on your equity, being your account balance + floating P&L (unrealised profits and loss) at the beginning of each trading day, 00:00 EET (UTC+2) / EEST (UTC+3).

The formula you can use to calculate the amount is:

Maximum daily drawdown (\$) = Starting day equity - Daily DD (\$)

For example, if you selected a 2V Two-Phase Challenge, the daily DD limit is 4%. If you have a starting balance of \$10,000, this means your daily DD limit will be a static \$400 per day. It does not change based on your current balance. For our example and calculation, we will imagine that you have an open position sitting at a loss of \$200 at the daily reset time, 00:00 EET (UTC+2) / EEST (UTC+3).

Open P&L at start of day: -\$200

Starting day equity = Starting balance + Open P&L
= \$10,000 - \$200 = \$9,800

Now we can use the starting day equity (\$) to determine what \$ value would be the maximum drawdown you would be allowed for the day (the floor), before breaching the limits.

Daily DD (\$) = Starting day equity (\$) × Daily DD (%)

Daily DD (\$) = \$9,800 × 4%

Your equity floor for the day (the lowest you can go to without breaching the limit) is
\$9,800 - \$400 = \$9,400

This means that if your equity touches \$9,400 at any time during the day, you breach the daily DD limit, and your account will be closed.

Calculating maximum overall drawdown (DD)

Because Volt Funded use a static overall DD, your floor is calculated from your initial starting balance (your capital plan amount), and it does not change with any profits or losses made intraday.

The formula you can use to calculate the amount is:

Overall DD (\$) = Starting balance (\$) x Overall DD (%)

For example, if you selected a 2V Two-Phase Challenge, the overall DD limit is 10%. If you chose the \$10,000 capital plan, then your maximum overall DD calculation will look like this:

Overall DD (\$) = Starting balance (\$) × Overall DD (%)

Starting balance: \$10,000

Overall DD %: 10%

Overall DD \$: \$10,000 × 10% = \$1,000

Your overall equity floor (the lowest you can go to without breaching the limit) is

\$10,000 – \$1,000 = \$9,000

This means that if your equity touches \$9,000 at any time during the lifetime of your account, you breach the overall DD limit, and your account will be closed.

What are the news trading rules?

You are not allowed to open or close a position ±2 minutes of a major or high impact calendar event, as per the FX Street economic calendar. Trading within these times is considered a minor breach and profit may be deducted. Two (2) minor breaches equate to a major breach, and your account will be closed.

Should I use stop loss and take profit?

Using Stop Loss (SL) or Take Profit (TP) when trading a Challenge or Funded account is not compulsory. However, as SL and TP form the basis of good risk management, it is strongly encouraged.

These tools help you protect your capital, maintain discipline, and avoid emotional decision-making, most especially during periods of high volatility or unexpected market events. Traders who consistently manage risk tend to perform better in the long run.

Do I have to make a profit every day?

No, there is no requirement to make a profit every day. In the evaluation Challenge, your account will be reviewed based on your overall performance, not day-to-day gains.

You are required to complete a minimum of 5 trading days in each Phase, meaning that you open at least one position during the day. You do not have a time limit to reach your profit target, so you can choose the best trading conditions, avoid over-trading, and maintain a sustainable trading rhythm that suits you and your strategy.

Can I hold trades overnight?

Yes, you are allowed to hold trades overnight.

Be aware that, depending on the instrument, swap fees may apply and will be factored into your daily drawdown calculations. Spreads can also widen overnight and may affect your profitability.

Can I hold trades over the weekend?

Yes, you can hold trades over a weekend, meaning you can carry positions from Friday into Monday without restriction.

There are some added risks that come about from holding trades over the weekend. These include, for example:

- Price gaps caused by geopolitical events, macroeconomic news, or low liquidity
- Wider spreads when the market opens
- Potential slippage that may impact or prevent Stop Loss execution

We encourage you to evaluate whether the potential weekend exposure aligns with your strategy and risk appetite.

While you can hold open positions over a weekend, weekend trading is not allowed, so you cannot open any new positions during this time. Trading over the weekend is a trading rule violation.

Is weekend trading allowed?

No, weekend trading is a trading rule violation and may result in your account being closed. You can hold any existing open positions for the duration of the weekend, but

you may not open any new positions after market closing on Friday and before market opening on Monday.

What happens if I break or violate a rule?

A violation of the trading rules may result in your account being closed.

Depending on the severity of the violation, they are classified into major or minor breaches.

A minor breach is a non-critical violation, and you will be issued with a warning notice. Two (2) minor breaches will equate to a major breach. A major breach represents a serious violation, such as exceeding loss limits or engaging in prohibited practices, and your account will be closed immediately.

In the event of your account being closed, you are allowed to purchase a new Challenge and start your evaluation again.

What trading strategies and practices are not allowed?

Trading strategies and practices not allowed on Volt Funded, for both Challenge and Funded accounts, are outlined below, grouped by category for easy reference.

The following trading strategies, practices and behaviours are not permitted:

1) Execution exploits and ultra-short scalping

- High-frequency trading (HFT), micro-/tick scalping.
- Arbitrage of any kind, including latency arbitrage, long–short arbitrage, reverse arbitrage.
- Gap trading and news-based gap trading (for example, within ± 2 minutes of major announcements).
- Server spamming, server-execution manipulation, exploiting pricing errors, demo-server freezes, or price-update delays.

2) Copying, coordination and cross-account activity

- Hedging across accounts, opposite-account trading, or any trade coordination to bypass risk limits.
- Third-party copy trading or copying signals from other traders/providers.
- Coordinated group trading intended to move markets or evade controls.

3) Banned systems and tools

- Martingale or grid strategies, and similar high-risk/inefficient approaches.
- Expert Advisors (EAs) and similar automated tools (any EA use is prohibited).

4) Platform misuse and account abuse

- Irregular or unauthorised access to the Dashboard, Account, or Platform.
- Allowing any third party to access or trade your account.
- Trading on behalf of others or offering account management services.

5) Market abuse and regulatory breaches

- Insider trading, front-running, or any transaction that breaches regulations.
- Trading that jeopardises our service-provider relationships or creates regulatory issues.
- Any deceitful or fraudulent activity.

Is hedging allowed?

Traders may hedge within the same account, but not across multiple accounts they may hold.

Is stacking or multiple entries in the same direction allowed?

Yes, traders may use stacking or multiple entries.

What happens if a trading rule, practice or behaviour is broken?

The action taken for breaking a trading rule, practice or behaviour depends on the nature and severity of the rule broken.

- A minor breach is a non-critical violation, and a warning notice will be issued. 2 minor breaches equate to a major breach.
- A major breach, such as exceeding drawdown limits or engaging in prohibited practices, is a serious violation and leads to immediate account closure.

If your account is closed, you will be allowed to buy a new Challenge and start an evaluation again.

Will I get a warning if I break a trading rule?

You will get a warning for a violation of a minor breach, which is non-critical. If you get 2 minor breaches, you will not get a further warning, your account will be closed immediately.

A violation of a major breach is a serious violation and you will not get a warning before your account is closed.

Accounts, Platforms and Instruments

What types of accounts does Volt Funded offer?

You can open a Volt Funded account and purchase an evaluation Challenge plan. Once you have completed an evaluation Challenge, you may be offered a Funded account.

You may have multiple accounts linked to your profile on Volt Funded, but the total capital of all accounts may never exceed \$200,000.

How do I upgrade or downgrade to a different account size or Challenge plan?

You are not able to upgrade or downgrade an existing account. You will need to buy another Challenge plan.

What platform can I use to trade with Volt Funded?

MetaTrader 5 is used for Volt Funded Challenge and Funded accounts.

MetaTrader 5 is the world's leading trading platform and a preferred choice of traders for its speed, stability, and extensive trading features. It can be downloaded and used on desktop or mobile devices or accessed through a browser.

Is the trading environment live?

No, trading on Volt Funded is simulated and carried out in a demo environment where the pricing and conditions mirror the live markets.

What instruments or assets can I trade with Volt Funded?

Following markets available for trading:

- FX: Majors (7) & Minors (22)
- Metals: (1) - XAU/USD

- Indices: (5) - UK100, US30, NAS100, US500, GER40
- Commodities: (2) - Brent & Crude Oil
- Crypto: (5) - Bitcoin, Ethereum, Ripple, Dogecoin, Solana

What are the spreads?

Volt Funded offers competitive spreads from 0.0 pips across all accounts. Spreads will vary depending on the instrument and trading conditions at the time of trading. This will be available in the platform.

What leverage is offered?

Volt Funded offers the following leverage, based on the selected Challenge type:

- 1V One-Phase Challenge and Funded account: 1:30 leverage
- 2V Two-Phase Challenge and Funded account: Up to 1:100 leverage

Does Volt Funded charge commission?

Some trades attract a commission fee, while others are commission-free, depending on the instrument.

- FX: 5 USD per lot (round turn)
- Metals: 7 USD per lot (round turn)
- Indices: Zero commission
- Commodity: Zero commission
- Crypto: Zero commission

Profits and Withdrawals

What is the profit split between a Funded trader and Volt Funded?

Volt Funded offers an industry-leading 90% profit split.

This means you keep 90% of all profits generated on your Funded account, while Volt Funded gets the remaining 10%.

How much profit can I earn as a Funded trader?

There is no limit to your earning potential and profits on Volt Funded, however, your performance, and subsequent profits will depend on:

- Your trading performance
- Your risk management

- The size of your funded account

When can I withdraw profits from my Funded account?

Once your account is at least 7 days old and you have reached a minimum of 5 trading days. After this, you may request a withdrawal in line with your payout schedule as outlined in the platform.

You will only be able to request a payout if you have no open positions on your account at the time of the request.

How are withdrawals processed?

As a Funded trader, you may request withdrawals of profits in line with your payout schedule as outlined in the platform. The request will then be reviewed by our team and approved or declined. You will receive email notifications on the process of your withdrawals. Once your withdrawal is approved and transferred, the time for you to receive your funds will depend on the payment provider or network.

Note: Identity verification, or Know-Your-Customer (KYC), must be complete before any withdrawal can be requested.

What payment methods are available?

We support several payment methods and providers, but these vary by region. Specific options available will be shown when you open an account and pay your activation fee for your evaluation Challenge.

Does my account size or risk limits change when I withdraw profit?

No, your account size and all risk parameters remain unchanged if you withdraw profit.

Legal, Compliance and Safety

Is Volt Funded regulated by any financial authority?

No, Volt Funded is a proprietary trading firm providing evaluation Challenges and simulate Funded accounts. We are not a financial broker offering brokerage or investment services. As such, Volt Funded is not required to be regulated by any financial authority.

We do, however, comply with generally accepted financial compliance requirements, meaning that we require you to complete identity verification if you are a Funded trader and you want to make a withdrawal from your account.

What is Volt Funded legal entity?

Volt Funded is a proprietary trading (prop trading) firm, registered as Parlance Trading Ltd, Bonovo Road – Fomboni, Island of Mohéli – Comoros Union, incorporated under registered number HY00423015 and licensed by the Mwali International Services Authority as an International Brokerage and Clearing Company under licence number T2023236 – which is the same legal entity under which Alpari Forex operates.

Does Volt Funded report trader earnings to tax authorities?

No, Volt Funded does not report your earnings to any tax authorities, nor do we provide any tax advice or guidance. Any taxes, levies, or fees that apply to your earnings under the Volt Funded Trader Agreement must be handled by you according to the laws and regulations of your country.

We recommend consulting a licensed tax professional if you're unsure how to manage your tax responsibilities.

Are there legal agreements or contracts to sign before trading?

Yes, we have certain legal agreements and restrictions: To use Volt Funded, every trader must:

- Accept the [Terms of Use](#)
- Agree to the Trader Agreement if you are offered and want to accept a Funded account
- Be of legal trading age in their country
- Not reside in a restricted jurisdiction or any country where Volt Funded services would violate local regulations

How do you protect my personal data?

We keep your information safe with industry-standard security and strict access controls.

- Stored on secure servers behind firewalls
- Encrypted in transit where required
- Strong authentication and role-based access only
- Regular reviews of our systems and physical security

- Access limited to vetted staff and partners under confidentiality obligations

More details are available in our [Privacy Policy](#).

How can I make sure my account is safe and secure?

There are a number of safety practices you can and should do to keep your account secure.

- Use a strong, unique password and a password manager. Never reuse passwords.
- Enable 2FA on your email, payments wallet, and any services linked to payouts.
- Keep your devices clean: update OS/browsers, run reputable antivirus, and lock your screen.
- Beware of phishing: We will never ask for your password or 2FA codes. Check sender domains and do not click on links or open attachments you weren't expecting.
- Only log in via the official platform. Bookmark it. Do not use search engine ads or third-party links.
- Do not share access or credentials. No account sharing. No manager or other person is allowed to trade on your behalf or log in to your account from another location.
- VPS/VPN: It is fine to use but keep locations consistent to avoid security flags.
- Close unused sessions and log out on shared machines.
- Limit third-party tools to trusted sources. Review permissions periodically and keep them updated.
- Public Wi-Fi: Avoid for account actions or use a trusted VPN.
- Monitor activity: Check your dashboard regularly for unfamiliar logins or changes.
