More than 60  
years on the  
road together.

01

Since **1963**, we have been transforming aluminium into motion, **designing** and manufacturing **doors, windows** and components for the **automotive industry**. Every window, every door, every detail is created to accompany

**people** on their journeys, both everyday and extraordinary, offering them a **pleasant**, comfortable and safe **experience**.

We have been **craftsmen** and innovators for over six decades.

We combine highly specialised **technical know-how** with a constant search for new and customised solutions. Today, we are an **international benchmark** in the automotive world, winning the trust of leading **international**

players looking for a **reliable partner** capable of guaranteeing quality and excellent service.

Excellence as  
our standard.

Sixty years of **passion** have taught us that **quality** is not a goal, but a commitment to be **renewed every day**.

02

With a state-of-the-art technology, a **fully controlled production** cycle and a network of established partners, we operate every day according to the **highest quality** and **safety standards**.

We have been **ISO 9001** and **IATF 16949** certified for years, as well as being recognised as a supplier that complies with the **standards** and specifications of **leading European** manufacturers.

Behind every one of our **projects** is the desire to **look ahead**.

We use the **latest technologies** for aluminium processing and plastic deformation, as well as the most up-to-date manufacturing methods. Every day, we **dedicate our people**, equipment and financial **resources** to researching technological innovations aimed at **constantly improving** our products, creating new ones, or improving production processes. Because we know that every window or door we make is not just a component: it is a **window onto tomorrow**.

Innovation  
that inspires.

03

## 04

Designing  
together,  
growing  
together.

Listen, **share**,  
**create** together.

Our **co-design approach** allows us to transform customer needs into unique solutions. Each project stems from a **genuine analysis** of needs and expectations, from **authentic dialogue** with our clients, and takes shape thanks to intertwined **skills** and **shared visions**.

## 05

Every project,  
a unique story.

From mass **production**  
to **custom** creations,  
the **same dedication**.

We know that **every customer** is **different** in terms of size, production numbers and commercial dynamics. That is why, over the years, we have developed an efficient and **flexible structure** capable of guaranteeing large-scale production or one-off pieces. Whether it is large-scale industrial production or tailor-made solutions, we always offer the same dedication: a **product** that tells a **unique story**, different from all the others.

Values  
that  
matter.

Since 2024, we have adopted the **Organisation, Management and Control Model Mod. 231** to promote a corporate culture based on legality.

In 2025, we obtained **UNI Pdr125 Gender Equality** certification to guarantee full equality and ensure the absence of any discrimination based on gender, origin, religion or other personal and cultural aspects.

Equity, honesty, fairness, environmental protection, gender equality and inclusion are the **pillars** of **our work**.

06

At your side,  
whatever the journey.

07

We believe that mobility is not just about getting from A to B, but about **experience, emotion** and **freedom**. From commercial vehicles to luxury yachts, from trains to cable cars, we operate in **different contexts** with the **same passion** and expertise.

- Commercial vehicles
- Recreational vehicles
- Busses
- Industrial Cabs
- Defence vehicles

- Firefighting vehicles
- Ambulances
- Railway
- Ropeways
- Boating

Our idea of comfort  
and safety.

# 08

The **design principles** behind every **high-performance** component we create.

- **Lightweight design** to reduce consumption
- Thermal **insulation** and energy **efficiency**
- **Waterproof** against rain and dust
- **Heated windows** and integrated ventilation
- Sound **insulation**
- Wide **panoramic** visibility
- Impact and vibration **resistance**

- Integration with **automatic** opening and **anti-intrusion** systems
- **Aesthetics** and attention to **detail**
- **High durability** for intensive use
- **High mechanical** and chemical **resistance**, for critical environments
- Ease of **installation**
- **Compliance** with **specific regulations** for different sectors

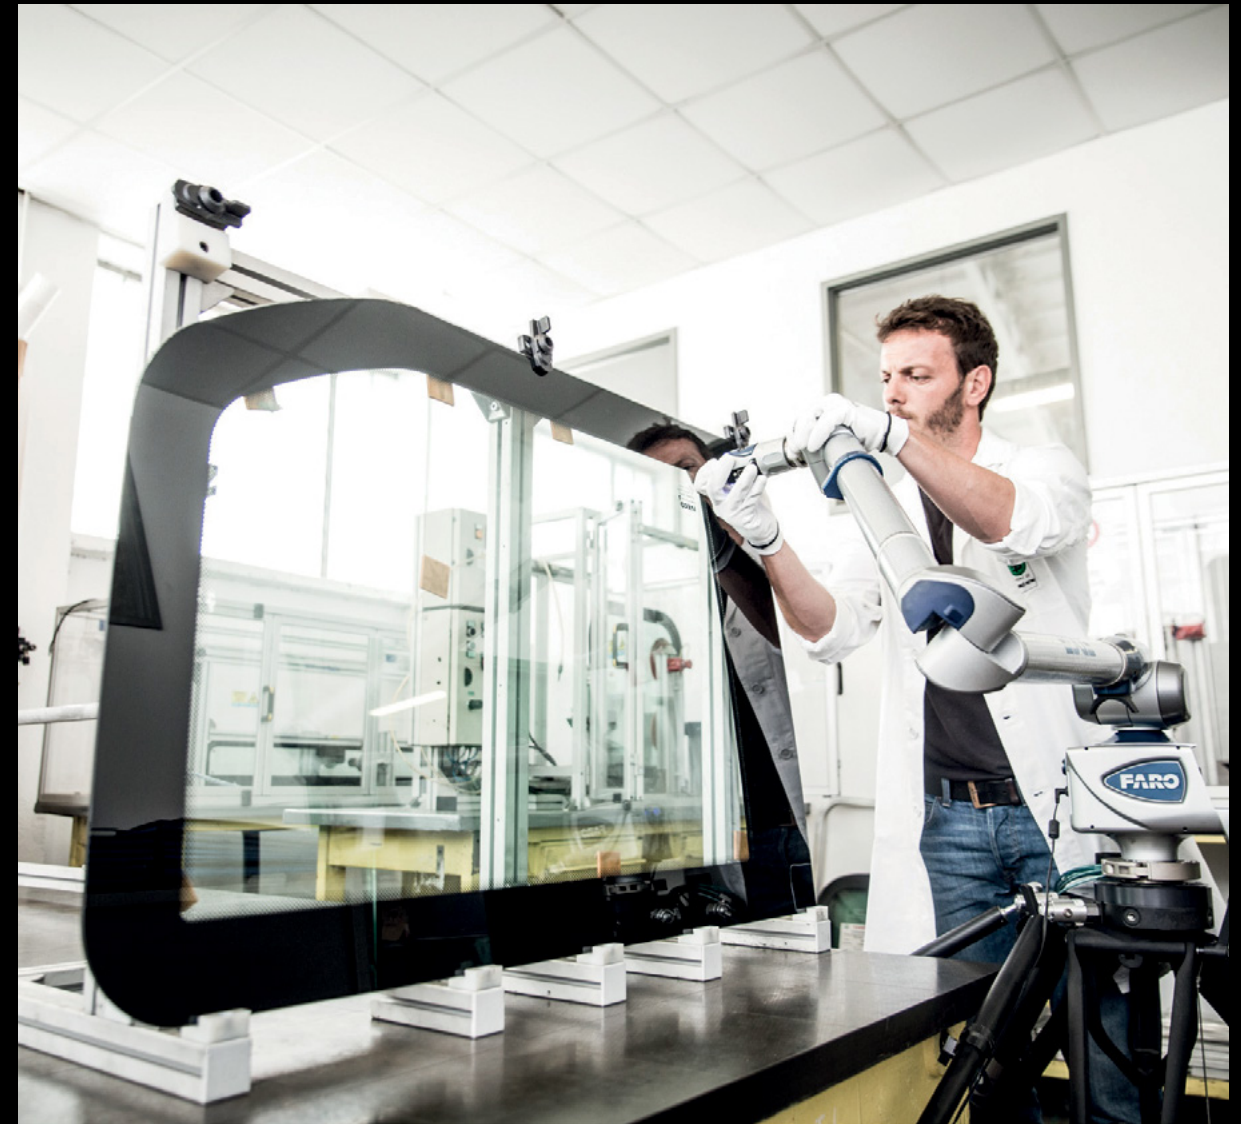

# 09

## Technology that takes shape.

We offer versatile solutions, with **special glass** and different **mounting systems**. All products can be fitted with flat or curved **tempered glass**, double **glazing**, **laminated** and **heated glass**, and glass with **special properties**, according to customer requirements and preferences

- **Windows** with horizontal or vertical sliding, wasistass, compass opening (manual or electric)
- **Windscreens**, rear windows, opening hatches
- **Frames**, supports and accessories
- **Driver's cab doors**, service doors and cargo compartment doors

Mounting by:

- **gluing**
- **rubber seals**
- **screwed subframe**
- **mechanical fasteners** (screws, rivets, etc.)

The **future** of **mobility** will be sustainable, intelligent and safe.

10

On the way for tomorrow.

We want to be at the forefront of this change, continuing to **shape** our customers' **ideas** and transforming them into **concrete, beautiful** and **lasting realities**.
