

SMS|HOST® AND NCR ALOHA POS INTERFACE

Interface Functionality & Benefits

Springer-Miller Systems' Level 1 Point-of-Sale interface utilizes a serial (RS232) communication protocol to provide seamless integration.

The interface allows both systems to have improved accuracy of information and overall efficiency through:

- Pre-posting inquiries that provide the Aloha user with detailed reservation, C/L, and Member account data
- Posting of detailed charges from Aloha to the SMS|Host system

Aloha POS

NCR's Aloha is an end-to-end solution that helps operators like you embrace digital transformation to run every aspect of your restaurant. Drive on-and off-premise revenue, streamline management and exceed guest expectations with our restaurant technology. With an all-in-one subscription model, core capabilities include fixed and mobile point-of-sale hardware, contactless dining, real-time alerts and analytics up to the second, online ordering, third-party delivery integrations, 24/7 dedicated customer support, payments and more.

Communicated Information

Your SMS|Host system and NCR Aloha POS interface supports but is not limited to:

INTERFACE FUNCTIONALITY

Pre-posting inquiry (Guest Name, Reservation, C/L, and Member Account)

Posting of room charges (Reservation, C/L, and Member Account)

Software and Hardware Requirements
