

SMS|HOST® AND SITEMINDER INTERFACE

Interface Functionality

Springer-Miller Systems' two-way distribution utilizes our web servicing technology, SMS|Diplomat to provide seamless integration with SiteMinder's suite of Distribution Services, including their industry leading Channel Manager product..

SiteMinder delivers both innovative technology and unmatched functionality with their industry leading Channel Manager product. The SiteMinder Channel Manager maximizes online inventory exposure for hotels through a real time connection between SMS|Host and the world's leading booking websites. This interface will not only drive revenue opportunities but will lower costs associated with the manual process of updating rates and inventory across multiple booking channels.

Through the use of the SMS|Host Channel Manager, hoteliers will be able to control how their inventory and rates are represented to various distribution channels managed through SiteMinder.

Interface Benefits

SMS|Host's integration with SiteMinder results in overall improved efficiency, increased revenue, and better accuracy of information through:

- Automation of reservation creation for bookings which originate in SiteMinder or any extranet channels that funnel through SiteMinder
- Real-time updates of availability for SiteMinder as its changes in SMS|Host
- Updates of the sell pricing in SiteMinder, once the rate value is updated in the SMS|Host Channel Manager
- Hoteliers can manage business strategies of how much and which inventory should be in SiteMinder

Communicated Information

Your SMS|Host system and the SiteMinder distribution interface supports but is not limited to:

INTERFACE FUNCTIONALITY

Reservations (new, modifications, and cancellations)
