WorldNXT Lodging Booking Engine

Product Benefits

WorldNXT Lodging Booking Engine integrates with ^{SMS}|Host for a seamless guest and staff experience.

The interface allows improved accuracy of information and overall efficiency through:

- Direct integration with ^{SMS}|Host's availability, rates, restrictions, and inventory.
- Online reservations flow in real-time without incurring transaction-based fees.
- Flexibility to book at the room-type or unit-specific level.
- Multiple bookings in a single shopping cart.
- Integration with WorldNXT Tee Times for an improved Lodging and Golf experience.
- Online cancellations, including refunds and forfeitures.

Interface Functionality

WorldNXT Lodging Booking Engine leverages Springer-Miller System's proprietary web services technology, ^{SMS}|Diplomat, to pull rates, availability, inventory, and restrictions in real-time. Embedded directly into a property's website, the WorldNXT Lodging Booking Engine features a flexible CSS-based layout, enabling the customer journey to be fully realized within your brand. The Booking Engine also provides leverage suggestive and comparative selling tools to engage your audience and boost your revenue.

Software and Hardware Requirements

The product is compatible with, and requires, the following:

- Current releases of the SMS Product Suite
- Diplomat Type II server (see Exhibit A - Hardware Requirements document)

Please contact your SMS Sales Manager for more information about the requirements.
