WorldNXT Vacation Rental Channel Distribution

Product Benefits

WorldNXT VR Channel Distribution integrates with SMS|Host for a seamless guest and staff experience.

The interface allows improved accuracy of information and overall efficiency through:

- Integration to over thirty major vacation rental channels.
- Publishing of SMS|Host rate changes and key level (unit #) and hotel level (unit type) availability to the channels.
- Processing of inbound reservations in SMS|Host.
- Central location for all connected channels, property listings, reservations, and guest messaging.
- Easily review rates, availability, and restrictions for each property listing.
- Flexibility in adding and updating property listings for review and validation prior to connecting them to the channels.
- User-friendly documentation within the application to either connect or create a channel account.

Interface Functionality

Springer-Miller Systems and our sister company, Fuel Travel have teamed up with BookingPal™, an industry leader in providing channel distribution of rates, availability, and restrictions. The distribution solution provides access to over thirty major vacation rental channels such as Airbnb and VRBO. WorldNXT Vacation Rental Channel Distribution allows the Vacation Rental Coordinator to remain in control by managing rates, availability, and restrictions in SMS|Host and utilizing one central location for all connected channels. The processing of inbound reservations in SMS|Host brings the integration full circle.

Software and Hardware Requirements

The product is compatible with, and requires, the following:

- Current releases of the SMS Product Suite
- Diplomat Type II server (see Exhibit A - Hardware Requirements document)
- Shift4 or Stripe

Please contact your SMS Account Manager for more information about the requirements.
