## 64017 Brake Drum

Effective July 1, 2009 the 64017 brake drum will become obsolete due to a decline in demand. This drum will be replaced by the 64117 brake drum with differences being the weight and drum type. The 64017 weighs 125.33 while the 64117 weighs 109.5 lbs. The 64017 is a Drum Type "M" and the 64117 is a Drum Type "O" having circumferential ribs; however, both drums are designed to fit the same brake application. See the drawing below for more details. If you have additional questions or need application support, please contact Webb's Technical Support Team.
